British Order in Council, Affecting American Commerce, Will Be Loosened Up and Flagrant Cases Will Receive Special Attention.

## BERLIN BACKS UP HOLLWEG IN CONCILIATORY STATEMENT

Efforts Being Made to Drive Every Russian From Galicia, After Which, Critics Believe, a Tremendous Campaign in the West Will Be Opened—British Steamer Torpedoed.

By Associated Press.

Washington, August 30.—Concessions in the enforcement against American commerce of the British order in council, were announced today as a result of informal negotiations just completed by the foreign trade advisors of the State Department.

The British ambassador, Sir Cecil Spring-Rice, assured the trade advisors that their informal representations, in cases where the British orders have caused "undue hardship" to American commerce, will receive special consideration.

Berlin, August 30.—It is understood today that Germany's course with regard to the Arabic case has been decided upon, and that it is in line with the recent conciliatory statement by Dr. von Bethmann-Hollweg, the German chancellor.

This development followed the return to Berlin of the chancellor, Admiral von Tirpitz and other participants in the conference with the German emperor at his headquarters on the eastern front.

No official statement has been made.

London, August 30.—Reports from the eastern front indicate that the Austrians and Germans are engaged in an effort to clear the left corner of Galicia, still held by their opponents.

The Russian lines on the upper Bug and the Zlota Lipa have been pierced, but it is not yet clear what resistance is being offered to the vast enveloping movement from the south.

## OLD GLORY DOTS SEAS

By Associated Press.

Washington, August 30.—Figures made public today by the Department of Commerce show the American flag now floats over more ships in foreign trade than at any other time since 1863.

On June 30, 2,768 ships, totalling 1,813,000 tons, were registered, an increase of 363 ships and 737,000 tons for the year.

## NEW LAW REVAMPS THE JOBS

By Associated Press.

Columbus, August 30.—Governor Willis today named as members of the new state civil service board, Z. B. Campbell, Ada, Republican, for four years; and S. D. Webb, Athens county, Democrat, for two years, under the Barnes-Moore civil service law, which went into effect last midnight, abolishing automatically the jobs of all public employees who had taken non-competitive examinations.

The new commissioners will receive \$4,000 salary. Both had served on the old board, as appointees of Governor Willis.

Most employees in public service had to be reappointed provisionally today, to hold their jobs. Later they will have to take examinations in competition with outside applicants.

Former Attorney General Hogan expected to file suit late today, to test the validity of the new civil service law.

He alleges it was not passed correctly by both houses of the legislature.

## TAG THEMSELVES ACROSS SEA

By Associated Press.

New York, August 30.—Passengers arriving here today, aboard the steamer Espagne, from Bordeaux, wore tags so that they might be identified if their ship was sunk by German submarines.

## WHEAT LOSS VERY HEAVY

By Associated Press.

Topeka, Kans., August 30.—The State Board of Agriculture today estimated the Kansas wheat yield for this year at 98,690,000 bushels, as against 138,700,000 in June.

Continued rains were held responsible for the big loss. Corn conditions are unchanged.

By Associated Press.

Columbus, August 30.—With the opening of autumn still three weeks distant, frost over northern and central Ohio, and a temperature of 40 degrees or less, was predicted by the United States weather bureau for tonight.

## BREAKS 1887 RECORD

Chicago, August 30.—A cold wave, sweeping over the western states last night and continuing eastward today, accompanied by frost, caused some damage to garden truck.

Mercury registered 47 here today, the lowest in August since 1887.

## FACTORIES HUM AGAIN

Bridgeport, Conn., August 30.—

Hundreds of factory workers, who had been on strike recently, returned to work today, disputes over hours and compensation having been adjusted.

In most instances the workers entered upon the eight hour schedule without a reduction in wages.

## Zapata And Villa Agree

Mexican Warriors Work for Peace and Desire Setting Up of Constitutional Government—Belief Prevails That Carranza Will Join Later in Peace Parley.

By Associated Press.

Washington, August 30.—Villa and Zapata agents here said today that a peace convention would be called soon in neutralized territory in Mexico, to set up a provisional government.

Independent Mexicans would take part, they said, and it was possible that the pan American conferees would be asked to arrange the details.

The delay in receiving General Carranza's reply to the pan American

can peace appeal has raised hopes that influences are at work to induce him to participate.

## AMERICAN KILLED

Washington, August 30.—Official dispatches from Vera Cruz today report the killing of E. F. Welles, an American, auditor of a large tobacco plantation company, by bandits who blew up a train and shot the passengers.

## DUAL CAREER OF SMOOTH CROOK

By Associated Press.

St. Louis, August 30.—For ten years John W. Kline, wealthy banker and respected citizen of Arkansas City, maintained a dual identity, but while under arrest here today, confessed to swindles on farm land deeds aggregating \$500,000, the police say. As a banker, he was known as John W. Barnhardt, and he conducted his swindles under the name of Kline.

Hundreds of complaints have been filed against him. Police say he is worth \$350,000.

## SOLDIERS GUARDING JAILBIRD

By Associated Press.

Murphysboro, Ill., August 30.—Three companies of militia today guarded the jail here, to prevent carrying out of threats to lynch Joe DeBerry, negro, charged with murdering Mrs. James Martin.

He was smuggled here last night from the Harrisburg, Ill., jail, where a mob had formed.

# PAVING WAY FOR PEACE PARLEYS

Officials' View of Germany's Change of Policy.

WILSON IN ROLE OF MEDIATOR

With Submarine Issue Disposed of the President is Expected Firmly to Assert the Rights of the United States Against British Violations of the Principle of Freedom of the Seas. Comment of Diplomats.

Washington, Aug. 30.—Officials in Washington think they can see in Germany's change of policy toward the submarine issue a larger purpose than the mere maintenance of friendly relations with this government. They believe that Germany, if not actually seeking to pave the way for peace negotiations, is at least preparing herself for the day when such negotiations will be begun.

The view that Germany is looking forward to possible peace developments from a settlement of the submarine issue is not mere surmise or speculation. It has a very substantial foundation in suggestions that have repeatedly been thrown out by German representatives in this country. Every since the submarine issue became acute they have urged informally upon Washington officials the great opportunity for a step in the direction of peace if the United States could only successfully mediate the submarine and blockade difficulties between Germany and Great Britain. It has been their contention that such an important step would probably prove to be only a beginning, and that the way would then be open for the United States to use its good offices in promoting a still broader understanding which eventually might result in peace.

Since the Arabic incident and the more conciliatory attitude of the German government toward the United States, talk along this line has been revived in German quarters here. Again the possibility of the president serving as a leader in the movement for peace is being held out.

Entirely aside from the German suggestions, officials here acknowledge that if the submarine issues is sufficiently disposed of, President Wilson will be much more available as a possible peace mediator than would otherwise have been the case. So long

as strained relations existed between this government and Germany the door was practically closed to President Wilson's attempting to play the important role of peacemaker in the European struggle.

There is no doubt here now that President Wilson is eagerly awaiting the opportunity to assert the rights of the United States against British violations of international law as firmly as he did against Germany. It can be said that he will move in this direction as soon as the submarine issue has been disposed of, and if he can bring Great Britain to make concessions, as Germany now seems disposed to make them, it is acknowledged here that he will be in the strongest possible position to offer his services as a mediator in the great war.

## CLEN DENNING IS ACCUSED

Columbus, Aug. 30.—In a statement given out here, Governor Willis charges Byron L. Clen Denning of Cincinnati, Democratic member of the state liquor license commission, with being connected with the McDermott liquor license ripper referendum movement. The governor is pushing the probe. He says: "I can not conceive of Republican appointees being so insincere or so far forgetting the party's pledges to the people as to become involved in such a movement as this, merely for the sake of saving a bit of patronage."

Charges that Governor Willis is informed of the fact that several of his appointees, including two Republican state license commissioners, are active in the effort to bring about a referendum on the McDermott liquor decelerator, is contained in a statement issued by Democratic state headquarters. It was the Democratic answer to the Willis announcement. Governor Willis characterized the charges as false.

## TWO KILLED AT WAVERLY

Waverly, O., Aug. 30.—Two men killed and one seriously injured is the result of an automobile driver's effort to avoid striking a boy on a bicycle at a turn on the Scioto Trail, south of here: The dead: Howard Wardlaw, driver; John Hughes, Bert Lawson, another passenger, was severely crushed. The auto crashed into a tree.

Young's Impromptu.

To most persons Edward Young is the author of "Night Thoughts" and nothing more, but he was also a man of the world and a shrewd and caustic wit as well as the rector of St. Mary's church at Welwyn.

It was there in the garden of the rectory that he composed some of the best impromptu verses known. He was walking with two ladies when some one summoned him to the house. His companions were agreeable, and he was in no haste to leave them. Turning as he reached the gate, he said: Thus Adam looked when from the garden driven

And thus disputed orders sent from heaven. Like him, I go and yet to go am loath; Like him, I go, for angels drove us both. Hard was his fate, but mine still more unkind; His Eve went with him, but mine stays behind.

## PRESIDENT AND HOUSE BREAK?

Chicago, Aug. 30.—The Tribune prints the following: "Colonel Edward M. House of Houston, Tex., and the president have broken over the former's espousal of the claims to recognition made by General Carranza, head of the Constitutional party in Mexico. There was a break between John Lind, former governor of Minnesota and the president's first personal envoy to Mexico, over the same proposition."

## BURN NEGRO AT THE STAKE

Sulphur Springs, Tex., Aug. 30.—Revenge for the slaying of a deputy sheriff and the fatal wounding of Sheriff U. B. Butler was taken by a mob here when King Richmond, a negro, seriously wounded, and the body of his brother Joe, killed in a fight with a posse, were burned at the stake in Buford park.

## GOLD FIGURES

New York, Aug. 30.—A second record shipment of gold from London reached New York, eighteen days after the arrival of the first consignment of \$19,534,200. The latest gold shipment was a few thousands less. Ulysses S. Grant, acting assistant treasurer at the subtreasury in Wall street, gave the value of the consignment as \$19,530,000. Of the securities which formed a part of the shipment there were said to be \$25,000,000 of American shares held by British investors.

Rules of the Game.

Industrial success is personal, not social. Society is not holding a man down; the existing social system is not keeping men at the bottom; it is their own personal deficiencies that keep them there. Industrial success can be won at a price, and the price is observance of the inevitable rules of the game—namely, sobriety, industry, saving, avoidance of speculation, knowledge of human nature, good judgment, common sense, persistence, intelligence and integrity. No social system ever keeps a man down who has these qualities. Is it not the best thing for the world to find out that industrial success can be won only by the display of these qualities?—J. Laurence Laughlin in Atlantic Monthly.

Channel Island Currencies.

The currency system of the channel islands is complex. Both Jersey and Guernsey have a coinage of their own and in addition permit the free circulation of the coins of England and France. Guernsey's coins of copper, which include a half farthing, do not go higher in value than a penny, but pound notes are also issued. And if you take in Guernsey on the way back from a holiday in France you can have a mathematical morning calculating how to pay your bill, stated in English, in the coins of France and Guernsey, for which you will have no use in England.—London Spectator.

All quiet in financial circles, they say, except now and then a "missing cashbox."

# SUFFS TO UNITE IN BIG FIGHT

Demand Removal of Sex Qualification From the Ballot.

Washington, Aug. 30.—Next month women voters of the United States will meet at the Panama-Pacific exposition and go on record as favoring the Susan B. Anthony amendment to remove from the ballot the qualification of sex. Three months later, during the first week of December, the members of the Congressional union and their supporters will rally in Washington and make a great demonstration before congress.

More than 3,000 women will take part in the San Francisco convention. At least 5,000 suffragists, men and women, will gather in the national capital for the December meeting. In the various states woman suffrage workers are calling on their representatives in congress to assist them by word of mouth and votes in the session next winter.

"We are determined to win from a reluctant congress what will establish for all time to come our rights as citizens of the United States," said Miss Lucy Burns, vice president of the Congressional union. "We have listed more than half of the members of the present congress and by a file index can tell just where they stand. Before congress meets we will complete our poll and will be able to separate the sheep from the goats, or the wolves. Our efforts this summer have been to line up each and every congressman."

## COLUMBUS FALL FESTIVAL

Thrilling aeroplane flights, four immense parades, music, a carnival and other free attractions, for both day and night, have been provided for the entertainment of the thousands of the city's guests expected in Columbus during the four days of the Columbus Fall Festival, to be held September 15, 16, 17 and 18.

The festival will be given under the auspices of more than 20 business civic, fraternal and other organizations, and the committee issues a general invitation to all Ohio to come to Columbus and enjoy four days of merrymaking. All entertainment provided by the committee is free.

On the evening of the opening day there will be held a "prosperity parade," in which have been entered more than 100 handsomely decorated floats, each in some manner symbolizing one of the various commercial, industrial or civic activities of the Capital City. The committee announces its belief that the prosperity parade will be the most pretentious pageant of its kind ever attempted in Ohio.

The second night will be featured by a special program of vocal and instrumental music in a great open air concert. The Columbus Oratorio Society, an organization with a wide reputation, will provide a chorus of more than 200 trained voices on this occasion.

A parade of elaborately decorated automobiles will be held the night of September 17, suitable prizes having been offered to insure keen competition in artistic decorations. The festival will close the night of September 18 with a grand mask carnival in the downtown section of the city.

DeLloyd Thompson, conceded to be one of the world's greatest aviators, has been engaged to give flights each day. High over the business section of Columbus, he will perform the loop the loop, fly upside down and perform one feat that has never been accomplished by any other living aviator, the "tumble flight," in which his machine rolls end over end side over side and defies the law of gravity.

## TWO POWDER MILLS BLOWN

Wilmington, Del., Aug. 30.—Two black powder mills of the Dupont Powder company at the Upper Hagley yards, near this city, on Brandywine creek, exploded with terrific reports. Lawrence Cunningham and John Gillespie, unmarried, were instantly killed. The cause of the explosion has not been determined.

Several hundred pounds of powder of a powerful brand were stored in each mill. The first to explode was a fuse plant, which caused the explosion of the second mill, near by. The two victims were employed in the first mill. Both mills were destroyed, being swept clean of their foundations. The force of the explosion hurled pieces of machinery, shafting and large stones for a great distance in every direction. Trees were uprooted or twisted as though a tornado had struck them. Houses shook in all parts of this city, four miles away, while the property damage near the mills was considerable.

## WOMEN FIGHT DUEL FOR MAN

Los Angeles, Aug. 30.—In a grim duel for the love of a man, carried on in a candle lighted cellar of an apartment house, two women were so badly cut by the ten-inch knives they used that both will probably die. The women, Mrs. Luerda Jaques, twenty-eight, and Mrs. Mary Gonzales, forty, were hurried to the receiving hospital, both bleeding copiously from severed arteries. According to the incoherent stories told by the dying women, they fought over a certain Juan Perez, a handsome Mexican. The two women stripped to the waist. Each was armed with a ten-inch knife. Circling about like cats, they fought fiercely.

## A Startling Presentation

The announcement carried in the news dispatches of Sunday's metropolitan press, that the diplomatic negotiations now pending between the United States and Germany, growing out of the sinking of the Lusitania and the Arabic, in both of which tragedies American lives were lost, may lead, ultimately, to a termination of the great European war, was startling.

The publication of those dispatches has, even granting that it had no more substantial foundation than the remarkable ability of a good news writer and a good news "maker," has set people to thinking and, if they were not cognizant before of the tremendous issues and possibilities involved in the discussion, even the diplomats must realize now that an avenue which leads to peace has been opened.

The story of the dispatches and the theory which the news writer has bared to public gaze is so entirely probable and the way to peace is pointed out with such precision and in such an amazingly simple manner that many people believe, and all hope, that the happening of the contingency pointed out may have been intended by the diplomats of this nation and Germany at the inception of the discussion.

Should the discussion finally resolve itself into an open acknowledgment of both governments guaranteeing the freedom of the seas there is nothing left to be done save for this nation to open a diplomatic discussion with England looking to securing the acknowledgment by that government of the principles contended for and agreed to by both Germany and the United States.

This, in effect, means that Germany and Great Britain accept the proffered service of the United States as mediator in an endeavor to bring Germany and Great Britain to an agreement regarding the main cause of the war. With such an agreement consummated between Germany and Great Britain through the mediation of the government of the United States, the cause of war being removed, peace would be assured and the diplomats of this nation would take first rank among those human beings through whose efforts the destinies of nations are wrought out.

Germany, it is stated as a fact, has been ready to accept every offer and every demand made by this nation in the final note in the discussion following the sinking of the Lusitania, and would have done so before this time but for the sinking of the Arabic.

When Germany does that, it is plain that she has acknowledged the claim of this nation for freedom of the sea and has also accepted the proffer of this government to act as mediator in an endeavor to bring an end to the greatest and bloodiest war of all times.

The surprise of the people when the possibilities of the present discussion were first indicated has been replaced by the sincere belief that official Washington will not allow the opportunity to pass by ungrasped.

The present situation may have developed without the intent of the president and his assistants, or it may have been their purpose from the outset to bring the discussion to the very situation it now presents. If the latter is true, President Wilson and his advisors must be given credit for being the greatest diplomats of all time.

Whether it was design or the stronger power which shapes the destinies of man is not, at this time, so important.

Whether the news dispatches were based on the present knowledge and intention of diplomats is not now important.

The opportunity is here and it is safe to say that every advantage which it affords in the way of bringing peace to Europe will be made to yield its full measure of results.

America's Military Defenses Inadequate to Cope With a First Class Power

By JACOB M. DICKINSON, Former Secretary of War

It is no departure from our traditional advocacy of peace to inform ourselves of our military status or to prepare ourselves to resist invasion or to protect our citizens in their just rights of person and property. If these things be militaristic then I am militaristic. The truth is that the time has not come when we can dispense with armament; THAT AT PRESENT, WITHOUT REGARD TO THE ATTITUDE OF THE WARRING NATIONS, OUR ARMY AND NAVY DEFENSES ARE WHOLLY INADEQUATE FOR WAR WITH ANY FIRST CLASS POWER OR EVEN FOR DEFENSE AGAINST AGGRESSION.

We never have had, and unless overpowering necessity forces it upon them, our people never will tolerate, a large standing army, but we must be prepared to resist unjust aggression. By shorter enlistments and passing men through the army into civil life subject to call we could largely increase our available force in a few years. Many more trained officers could be graduated from West Point, many more in any case than we need in times of peace, and the surplus passing into civil life subject to call could build up a corps to be relied upon in case of necessity.

OUR NATIONAL GUARD COULD BE VASTLY IMPROVED; PROPER STORES AND EQUIPMENT COULD BE PROVIDED. ALL THIS COULD AND SHOULD BE DONE.

## Poetry For Today

A COUNTRY SCHOOLHOUSE.  
Lo, guarding their treasure-heaps of corn,  
The great barns shoulder the mists of morn;  
One after one, in their sheltering groves,  
Are homes this neighbor and that one loves;  
The very cattle keep prosperous state;  
No time-wrecked timbers or sagging gate  
To render their keeping less secure;  
Watched and guarded, early and late,  
The farmstead's care is sure.

But what is the building down the hill—  
The narrow room, with a broken sill;  
With streaks of rust on the crumbling brick;  
Its bleak-eyed doorway braced by a stick?  
There are broken seats within, and look  
Where one rent, grimy, battered book  
Proclaims thru its grime that living thought  
Some purpose dim to this place has brought.  
A jester wandering by—some fool—  
Dared call this the neighborhood's country school.

Shame! Shame upon us, if this should be  
The only house they could build for thee—  
For thee, thou hope of a yearning race,  
Thou, newly ventured from Love's embrace  
In the light of thy parents' smiles and tears;  
Prayer of the struggling pioneers,  
Who fought their flight with the stubborn soil  
And bore their meed of "relentless toil"  
To free thy soul in the coming years!

Look, child of the brave New World,  
And see  
The fitting shrine of thy spirit free!  
Lo, its bell shall ring thee more gladness still,  
Its beauty waken thine ardent will,  
It shall shine afar like thy guiding star  
At its open gate shall thy future wait!  
But slowly wakeneth the people's strength  
While that cumbereth the ground which shall fall at length,  
—Yet prisoneth spirits that should be free  
And blighteth the promise of infancy.  
—Florence A. Kellogg, Delaware, O.

## Luke McLuke Says

You can make a woman madder by ignoring her than you can by calling her names.

When a girl marries she usually loses a good friend and gets a grouchy boarder.

Politics is one of our most popular sports because you can talk it all day and not know a blame thing about it.

When they are engaged they imagine that they can get along with one chair when they go to housekeeping. But after they have been married for awhile they want two different bedroom suits.

The lad who loafs around and owes everybody in town is the same fellow who is deeply worried because the Panama canal isn't paying expenses.

The old fashioned poker player who used to walk around his chair to change his luck now has a son who can deal a diamond from the bottom when his stack gets low.

Before he gets her he thinks she is a hummingbird. After he gets her he discovers that she is a screech owl.

Conscience may help some. But the fear of getting caught is what keeps most of us straight.

A woman may have no aim in life. But she always seems to hit the target when she starts out to shoot Friend Husband.

There isn't any fun in fishing if you have to catch fish for a living.

Before she gets him she believes all he tells her about his prowess as an athlete. After she gets him she discovers that about the only sport he excels in is throwing the bull.

Once in awhile father will play foxy when he comes home with a fine bun on, and he will carefully hide his money so mother won't find it, and then he will get up with a big head and a dazed feeling and stall around for an hour trying to remember where he hid the blame money.

Most of the men who are seeking positions are dodging jobs.

## DEFIED THE AUDIENCE.

Then the Audience Forced Adelaide Neilson to Surrender.

In "Forty Years On the Stage" the author, John H. Barnes, an old time actor, has this to say of Adelaide Neilson, the once famous star:

"One quite extraordinary gift she had—namely, that of tears. At any given moment or cue she could make the tears mount to her eyes and even run down her cheeks irrespective of anything she was feeling at the time. It almost resembled the turning on of a tap. Undoubtedly she had great beauty—wonderful eyes and an expressive mouth, fine coloring of complexion and hair and a rather spare figure.

"Her appearance suggested a woman of Spanish or Italian type. As a matter of fact she was born of humble parents in a village in Yorkshire in 1848, and her real name was Elizabeth Ann Brown. In her youth she was by turns a mill hand at Guiseley (York), a nursemaid and a barmaid, so the strenuous life she must have led to raise herself to the position she eventually attained may be imagined."

An example of the temper that sometimes flared from behind the Neilson beauty is included in this passage:

"A curious incident occurred in Baltimore. The play was 'As You Like It.' Milnes Levick played Jacques and had spoken the 'Seven Ages' speech very finely, gaining tremendous applause at the end. Miss Neilson (as far as I know without intent) said, 'Go on, go on,' and the scene was taken up before the applause died down.

"The audience got annoyed and seemed to feel that it was being treated scurvily and kept up the applause in a manner which stopped the play. Miss Neilson ordered the curtain to be rung down, and then the storm burst out. It became a battle royal between her and the audience, who simply declined to listen to a word until Mr. Levick had repeated the speech. A silly scene, which might have been avoided, but became an absolute deadlock, out of which there was only one way. The audience was master of the situation."

## LOVE LINKED WITH DEATH.

Where Women Propose and if Rejected Must Kill Themselves.

In the Pacific ocean, between Fiji, New Guinea, New Caledonia and the continent of Australia, lies the Melanesian group of islands, where head hunters and cannibals abound. Strange and gruesome are many of the customs of the tribes, there are some that are most romantic. For instance, on the island of Tucupia the women propose marriage instead of the men.

When a girl of Tucupia sees a man whom she thinks she would like to have for her husband she does not rush up to him and ask him to marry her. On the contrary, she gives the subject deep thought and often the man a most careful investigation before she "pops the question." The reason is that his answer spells life or death to her.

It is a tribal law that any woman who has been refused must forthwith kill herself. Therefore a woman asks a man's hand only when she feels sure that his answer will be the happy one.

Many are the strange and seemingly inexplicable questions with which the women of Tucupia ply the stranger who cannot realize the personal motive back of the solicitude of the dusky belles who inquire if he is married or not and the state of his wife's health. Romances are consequently very apt to turn out in happy marriage.

But there have been innumerable instances when a poor girl, smitten by the newcomer's charms, has been compelled to kill herself because the man with whom she has fallen in love has had to refuse to marry her.

Baldness with the women of Tucupia is a sign of beauty, and never until she is bald does a Tucupia woman become fully convinced that she is really lovely.

But, bald or not, she takes great care whom she asks to marry her, for the tribal law has never been known to fail. If a rejected woman does not kill herself she is executed under the most dishonorable conditions by the leaders of the tribe.—Buffalo News.

The Warsaw campaign should be full of lessons for juniors in the general staff corps of all armies. The real whys and wherefores will not be known until we have official reports from opposing commanders. The Russians will argue that Warsaw is no great gain for the kaiser and had the Germans been hurled back finally from the very gates, as they were temporarily in October last year, they might have contended that it was no great loss. So long as the Germans were well up in front of it with trenches and big guns they could keep up a clatter and force the enemy to retain troops there which were needed for their campaigns north in East Prussia or south in Galicia. Under cover of a pretended lunge on Warsaw last winter they surprised and routed a large Russian column in East Prussia. And all the time the Russians were forging west toward Cracow, in Galicia, and south over the mountains toward Hungary they had the enemy on the flank and rear, prepared possibly to drive on past Warsaw and cut communications with the Russian bases. The Warsaw campaign may not prove decisive on a vital scale, but is a military marvel perhaps unequalled.

# STREET CAR CRASHES INTO HAGLER MACHINE

Five Fayette County Persons Are Injured, None Dangerously It Is Thought, in Accident on North High Street, Columbus, Sunday Afternoon.

## THREE OF VICTIMS TAKEN TO HOSPITAL

Howard Hagler, Alone, of Six Persons in the Car, Escapes Unharmed—Crash Occurs When Driver Attempts to Cross Street Behind One Street Car, Only to Enter Path of Another From Opposite Direction.

**The Injured.**  
Mrs. Roy Hagler, Hagler's Station, cut and bruised.

Miss Mary Robinson, Circle Avenue, teeth knocked loose and face and body bruised and cut.

Alfred Hagler, 8, son of Roy Hagler, bruised.

Miss Maggie Clemens, bruised.

Grove Davis, son of Mr. and Mrs. Ben Davis, aged 11, bruised.

Six persons, two of them children, barely escaped violent deaths in Columbus late Sunday afternoon, when a High street car, southbound, struck the automobile in which they were riding. The accident occurred at a point on High street between Spruce and Goodale streets.

Of the six occupants of the car, Howard Hagler, owner and driver of the machine, alone escaped unharmed. The others were cut and bruised but none critically injured. It was believed early Monday. The automobile was wrecked.

Mrs. Hagler, Miss Robinson and Miss Clemens were taken immediately after the accident to Protestant Hospital. The children were taken to the home of Mrs. Luella Herbert, sister of Mrs. Hagler and Miss Robinson, in Columbus.

Relatives here were in telephone communication with Mr. Howard Hagler Sunday evening. He stated that the condition of none of the women was regarded as serious at the hospital and expected that Mrs. Hagler and Miss Robinson would be able to leave the hospital Monday evening. Miss Clemens, however, may remain at the institution several days.

The severe shock was the most important result of the accident. The children were the least hurt of the injured people.

The party had left here early Sunday afternoon and was just going into Columbus when the accident occurred. They had intended to visit the state fair and had arranged to meet Mr. Roy Hagler, who, with his son Jesse and daughters Ruth and Mary had motored up earlier to look after his exhibits.

Mr. Hagler was driving north on High street. It is said the accident occurred when he attempted to drive from the east to the west side of the street, going around a north-bound street car only to be caught squarely in the track by another going south.

# B. & O. OFFICIALS GETTING RIGHT DOWN TO BUSINESS

A. Thornton & Son Receive Telegram From Headquarters, Requesting Them to Vacate Their Coal Yard, Situated on the Railroad's Property, Within 30 Days.

That the B. & O. Railroad is making a sincere effort to carry out its promise to have a new depot in Washington C. H. "before the snow flies," is indicated by a telegram received by A. Thornton & Son, whose

coal yard is located on B. & O. property, between Temple and Paint streets.

The telegram requests that the property be vacated within thirty days.

On the heels of the telegram came Chief Engineer Gabriel, of Chillicothe, with a crew of assistants, who immediately engaged in surveying the property.

The engineers have been busy at work all day.

The Thornton company has taken steps to vacate, but has not yet announced its new location.

## POLICE ARREST BOYS WHO STOLE BICYCLE

Acting Chief of Police Baughn Sunday arrested Arthur Beatman, 16, and Marvin Church, 17, who confessed to stealing a bicycle from Clyde Woody, Friday night and selling it in Xenia. They said they rode the wheel to Xenia Saturday.

The lads were severely reprimanded by Mayor Coffey and will be forced to make restitution.

## ANNUAL CONVENTION CONVENES WEDNESDAY

The 38th annual convention of the Woman's Christian Temperance Union will be held in the First Baptist church on Wednesday, September 1.

Mrs. Stella Snodgrass, of Xenia, State Lecturer, will have charge of the day's program and also delivers a

lecture at the same church the evening of August 31st. Her subject "Finger Points upon the Nation."

Mrs. Snodgrass has been a Red Cross nurse and worked in the slums of Chicago and brings a message of great interest.

The public is cordially invited to attend.

## ALLEN RECRUITING HORSES AT EXPO.

Mr. Charles Allen left Monday morning for Columbus, where he will look over the state fair horse exhibits with a view to securing some Ohio equine for exhibition at the Panama-Pacific exposition. Mr. Allen is a member of the Ohio commission to the big fair.

It is probable that animals from the Hagler and Janes stables, this county, will be included in the choice as these horses are regarded as among the best in the state.

## KEYNOTE OF DRY CAMPAIGN

Dr. A. C. Bane of California, National organizer of the Anti-Saloon League, and Col. Worthington Lutzman, former adjutant general, now state county organizer of the league addressed an audience in which all the city churches were represented, at Grace church Sunday night in the interest of the dry forces of Fayette county organizing for the coming election.

Fayette is one of the three last counties in the state to organize for the work of stirring to fresh activity temperance sentiment and crystallize it into votes for state prohibition this fall. A county executive committee was appointed some time ago but has been unable to secure the necessary head for the success of the work.

Rev. Wm. Boynton Gage, pastor of the Presbyterian church, presided. Dr. Bane is a brilliant orator and made astonishing statements in regard to the spreading of pro-temperance sentiment throughout the nation.

The speaker cited the terrific progress of the last thirteen years, during which each day had averaged the driving out of 40 saloons. He said that by the first of next January 85 per cent of the territory in the United States would be dry and the saloon was already penned up in a few of the largest centers.

Dr. Bane claimed that Cincinnati's failure to secure the Regional Bank was due to the fact that examiners found that 40 per cent of the securities of the Queen City banks was in distillery stock.

The second speaker took up the discussion of the financial end of the coming campaign. Owing to the large extent of wet sentiment in big cities and the labor troubles which were impoverishing certain Ohio counties, he urged the necessity of counties that had long been dry like Fayette, coming to the rescue with generous donations.

Following the speeches action was taken endorsing the present county temperance executive committee and urging the securing of a secretary at once.

The committee will hold a meeting for that purpose tonight.

## DEATHS AND FUNERALS

GAULT—Nela Mary Gault, aged 1 year, daughter of Wm. P. Gault, died Sunday evening at 8 o'clock, at the residence near Eber. Funeral services will be held Tuesday at 1:30 p. m. at residence. Burial will be made in Bloomingburg cemetery.

## RESIGNATION IN EFFECT

Mr. J. G. Williams' resignation as Union township trustee took effect Monday and Mr. A. T. Vincent was appointed to fill the vacancy on the board.

Mr. Williams is one of the new commissioners who enter upon their duties early in September.

## CARNIVAL ARRIVES

The Ferrari Shows United, showing here this week in connection with the Odd Fellows' Fall Festival, arrived in the city Sunday and unloaded their huge equipment at the Hagler field on South Main street.

## MIGHTY HEIRONIMUS IS BADLY BATTERED

The Wilmington Clintons came in for a sorry defeat in Cincinnati Sunday, at the hands of the Avondale ball club. The Queen Citizens got into Mighty Heironimus for seventeen hits and took five walks on his wild ones.

The score stood 13 to 4 for Avondale in the eighth inning, when the game was called on account of rain. Swain, who umpired part of the Wilmington-Washington series, did the refereeing.

The Clinton lineup was minus Chapman and Mooremen.

## WILMINGTON WILLING FOR ANOTHER SERIES

Although Manager Noon has not had a face to face talk with the Wilmington ball club management, he learned Saturday from the camp of

the Clintons that the latter team is agreeable to another series, and is ready to start a week from Sunday at Wilmington.

Before anything definite is arranged, however, Captain Runnells will make a trip to Cincinnati, to look over some pitching material. Runnells will go to Cincinnati Tuesday.

## WOODLAND STARTING AT NAPOLEON FAIR

Frank Woodland, of the Horse Journal, left Monday for Napoleon, O., where he has been engaged as starter for the annual Henry county fair races this week.

W. F. M. S.

Meeting of W. F. M. S. will be held Tuesday, at 2:30 p. m. in the church parlors. The officers will act as hostesses. Annual mite box opening and election of officers. The last meeting of the conference year. Let every member be present. Note change of day from Wednesday to Tuesday.

# Palace Photo-Play Theatre

Presents Tuesday, Aug. 31—MATINEE and Night  
**WM. FARNUM**  
The stupendous \$100,000 Screen Star, in  
**"The Plunderer"**

By Roy Norton. A thrilling drama of love—the lust for gold and deadly hatred. The bare fist fight in this picture is positively the greatest fight that was ever staged on or off the screen. This picture is said by New York critics to be equal to "The Spoilers," if not better. It is the kind of a play that shows Mr. Farnum at his best. The exterior scenes were taken in and around the great Coeur D'Alene Range, which is noted for its beautiful scenery. All in all this picture is the event of the season. Below is a good likeness of William Farnum, and was taken from the character Big Bill Matthews, which he portrays in "The Plunderer."

# MID-OCTOBER SET FOR LOOSENING WAR DOGS

Progress Made in All Sectors of Eastern Line Save Courland.

TEUTONS APPROACHING VILNA

Mid-October Chosen as the Time For the Long Postponed Offensive of the Allies on the Western Front. Speculation Rife as to Future Movements of the Germans—No Signs of Letup in Teutonic Drive in Russia.

London, Aug. 30.—There are no signs yet of any slackening of the German pursuit of the retreating Russians, and according to the official report issued in Berlin, progress has been made in all sectors of the eastern battle line except that in northern Courland, where the armies of Grand Duke Nicholas are offering a stubborn and effective resistance.

From the southeast of Kovno, where the Germans claim to have broken the Russian resistance and must, therefore, be approaching Vilna, along the Niemen to Grodno and thence southeastward through the forest of Bieloviez and along the borders of the Pripiet river marshes, the Russians are falling back to new positions.

Speculation again is being indulged in as to whether the Germans intend to follow the Russians farther or prepare positions from which they can hold the Muscovites, while the Teutons attempt an offensive in the Balkans.

## DROP BOMBS ON AUSTRIANS

Rome, Aug. 30.—Italian aviators have completely wrecked the Austrian aviation base at Divassa, east of Trieste, according to the official statement of the war office. All of the Italian aeronauts returned safely. The military authorities have ordered compulsory cholera vaccination for all men and officers in both the army and navy. A good many Austrian soldiers who had been moved from the Gallician front to the Italian front have recently been made prisoners, and there has been some fear that they might bring the disease with them.

## What Causes Tuberculosis?

THERE can be no tuberculosis without the germ, the tubercle bacillus. Whether the disease appears in the lungs, in the hand, in the hips, or in the eye, it is the same germ that always causes it.

Looking at it from another way, however, the germ of tuberculosis can never cause the disease unless the soil has been prepared for it. It is as if the germ were the seed and the body were the soil. You cannot raise wheat on a hard, cobblestone pavement nor can you grow corn on a boardwalk. Neither can you grow tuberculosis from the tiny plant-like germ which causes the disease, on a soil which is hard and resistant. The tissues of the body in which the disease is to develop must first be weakened and made flabby and prepared for the growth of the disease somewhat as the farmer prepares his soil before sowing his seed.

What are the causes that prepare the soil for the growth of tuberculosis germs in the body? There are first of all, a group of causes which lie within the individual himself, which we may call personal causes. Some of them may be controlled by the individual and some of them are beyond his control. Take such causes, for example, as intemperance, lack of proper food, a weakened physical condition caused by grippe, colds, pneumonia, measles, typhoid fever, etc.—these are some of the personal causes which prepare the soil for the tuberculous seed. Then there is also another group of causes which are entirely outside of the individual and which we may designate as environmental or social causes. Some of these are, for example, bad living and working conditions, lack of play and recreation facilities, unclean streets, etc.

These two groups of causes may either separately or altogether, act upon one so that his normal strength and vitality, which we call resistance, is lowered and he readily becomes a prey to the disease germs which are constantly lurking about and which he may be harboring in his body without knowing it. Let us consider some of these causes a little more in detail.

Of the personal causes that lead to tuberculosis, probably intemperance may be reckoned as one of the most important. By intemperance is meant everything in the way of self-indulgence that injures the body. One may be intemperate in eating and by partaking of too much food may produce permanent digestive disturbance which weakens the bodily resistance. One may be intemperate in the use of drugs or in other ways, thereby weakening the bodily resistance. The most frequent form of intemperance, however, is the use of intoxicating liquors. Any man who drinks beer, wine or whiskey to excess is preparing the soil of his lungs for the seed of tuberculosis. This is the reason why the mortality from tuberculosis among men and women who are accustomed to drink is so high, much higher according to reliable statistics than among people who do not use intoxicating liquors.

Many children from the time they are born into the world are doomed to starvation. Other people because they like candy, pie, and cake better than meat, bread, and vegetables, are starving themselves willfully. This underfeeding or lack of proper food will as surely prepare the soil for tuberculosis as if one deliberately set out to do so.

Many people have a notion that if they have apparently recovered from a bad cold or an attack of grippe or pneumonia, there is no further danger and they are perfectly safe. Oftentimes the most dangerous period in an acute disease is during the few weeks immediately after the patient is able to be up and about. It is during this time of convalescence that the seeds of disease will find a sure root if special care is not taken. Fresh air, good food, rest, and right living are the best safeguards against tuberculosis during a time such as this. T after-effects of many diseases can be avoided if the patient will continue to persist in taking care of himself just the same as he did when he was in the bed and under the doctor's orders.

Then there are those causes of tuberculosis which are entirely outside of the individual such as bad housing conditions. Dark rooms where the sun never shines are among the best breeding places possible for the germs of tuberculosis. Here they thrive in great quantities and it is almost impossible to dislodge them. Dark, filthy hallways, unclean sinks, and dirty backyards and toilets are also menaces to the health of those who live near them. Many a man can improve these conditions with a little effort if he will take the time to do so. More often, however, it is the landlord's fault that the housing conditions are not better.

Low wages, long hours of work, dark unventilated factory rooms, excessive heat, and dusty occupations are only a few of the conditions which make it easy for the seed of tuberculosis to attack the working man. The lack of proper places for play and recreation, which makes a man go to the saloon at night instead of into the park or playground, is a social cause leading to tuberculosis. These social causes can be fought only by the united effort of the men and women of the community. Individuals can help but it takes all shoulders at the wheel to produce effective results.

In conclusion, remember that the soil must be right before the seed of tuberculosis can grow, and that you can contribute much towards keeping the soil of your body in such condition that no germs will find a root there.

## OHIO NEWSLETS

Columbus, Aug. 30.—Guard W. C. Beinecke of Marietta is in the prison hospital in a serious condition as a result of stab wounds in the right leg and an enormous loss of blood. The attempt to murder Beinecke was made by Ira Mariatt, the "prison demon," who was committed from Columbiana county nearly a score of years ago to serve a life sentence for having murdered a sheriff at Lisbon.

John D. as the Prodigal Son.  
Cleveland, Aug. 30.—John D. Rockefeller pictured his life as identical to that of the prodigal son, after hearing Rev. Samuel Lindsey portray the folly, failure, willfulness and repentance of the prodigal in his sermon at the Euclid Avenue Baptist church. "You are right," said Mr. Rockefeller. "I can see in myself the prodigal son."

Ohio State Fair Opens.  
Columbus, Aug. 30.—Ohio's state fair and industrial exposition, showing the state's wealth of natural and manufactured products and illustrating its progress, opened today and will continue day and night until Saturday. New features are an exclusive automobile display and night horse show.

Patrolman Uses Gun.  
Cleveland, Aug. 30.—Fighting for his life with eight gangsters whom he was attempting to arrest in an alley, Patrolman John A. Pasick shot and killed Joseph Ewoanscho. Later two men were arrested.

## Newspaper Advertising

Goes direct to the people and the people constitute the buying public. Newspaper advertising not only talks but it emphasizes; it has the undivided attention of the reader and covers a field no salesman can hope to reach. There are many styles in newspaper advertising and the small announcement, which costs only five cents, is just as effective in its way as the larger one, which costs proportionately more. The benefits to be derived can not be measured by the size of the ad, for the very good reason that the small, inexpensive announcement invariably proves effective. Newspaper advertising costs from five cents up to any price the advertiser desires to pay.

# CLAIM THOUSAND CANADIANS LOST

Passengers on Holland Liner Say British Transport Was Sunk.

TORPEDOED BY A SUBMARINE

Disaster Said to Have Occurred Off the Scilly Islands on August 15—No Hint From British Sources in Substantiation of the Story—Transport Carried Two Thousand Men, Bound For Western War Zone.

New York, Aug. 30.—One thousand Canadian troops were lost when a British transport with 2,000 Canadian soldiers on board was torpedoed by a German submarine off the Scilly Islands on Aug. 15. Such is the substance of a wireless dispatch received at Sayville from Berlin. Passengers on the Holland-American line steamer Ryndam brought in the report.

The Scilly Islands lies off the southwest coast of England, near the line of steamship traffic between New

York and Southampton. German submarines have been active in these waters. Movements of transports are kept secret by the British admiralty, so that there has been no information to indicate whether a Canadian troop ship was in the vicinity of the Scilly Islands on the date mentioned.

No hint has come from British sources of the foregoing report. While it is possible that, had such an event occurred, the British censors might have withheld the news, this is improbable in view of the fact that official announcement was made promptly of the torpedoing of the British transport Royal Edward in the Aegean sea with the loss of about 1,000 men. The Royal Edward was sunk on Aug. 14, one day before the date mentioned in the wireless dispatch from Berlin, and it is possible that the report brought in by the Ryndam's passengers is a garbled version of this incident.

**STORY DENIED**

Ottawa, Aug. 30.—The report that a Canadian troop transport had been sunk off the Scilly Islands was officially denied here.

## BELGIUM PROBLEM GROWING

Eighty Million Dollars' Worth of Food Sent By America.

New York, Aug. 30.—Since the first cry of homeless Belgian women and children reached across the seas America has sent \$80,000,000 worth of food to the war-ridden little kingdom, according to the latest report of the commission for relief in Belgium. Including the grain and foodstuffs sent from the United States alone, this report shows the shipments have reached a total of 458,216 tons. If the shipments from Canada and other countries were to be added, the commission estimates the aggregate probably would exceed 2,000,000,000 pounds.

A shipload of food every forty-eight hours was necessary during the winter and spring to feed the Belgian population of 7,000,000 on a per capita ration of ten ounces a day, about one-third of a soldier's ration. During the summer the requirements of Belgium were considerably lessened as a result of the German military authorities conceding to the Belgians their grain crops, and this greatly facilitated the commission's work. With the approach of the winter months the commission expects the Belgian needs to become again greatly increased, and urges generous financial support.

**10,000 RUSSIANS MADE PRISONERS**

Vienna, Aug. 30.—The Russian hold on the last part of Galicia seems to have been completely broken by the Austro-German offensive begun in this region Friday. The war office reports that the Russian line on a front of 160 miles has broken down, that the Russians are in retreat and that during the first two days' fighting of the new campaign 10,000 prisoners were made. The new attack is over a front reaching from Wladimir-Wollinsky, a few miles north of the Galician border, in Russia, to a point 160 miles south. The advances indicated by the war office in its statement show that already the Russians have been driven back for a distance varying from fifteen to twenty miles.

**A Sample of How Cleverly They Are Mixed In France.**

Politicians of the United States are supposed to be gifted above those of all other countries in the art of self advertisement, but it is doubtful whether any of our politicians are more adroit in this respect than certain Frenchmen. Witness, for example, the following announcement, published in the newspapers of Paris:

**"GENERAL ELECTION.**

"To the Electors of the Steenth Arrondissement, City of Paris: The undersigned appreciates the flattering desire of many of his fellow citizens that he should represent this arrondissement in the chamber of deputies. Always proud to feel himself in accord with his fellow citizens, he is convinced that he would represent them faithfully and that his nomination would be equivalent to an election.

"Fully appreciating this fact and thanking the citizens of the Steenth arrondissement for their confidence so generously bestowed, he begs leave, nevertheless, to announce that the great increase in his business as a dealer in hats at 1000 Rue de Margueilles fully occupies his time and attention and that his service to the public at this well known establishment will unfortunately prevent him from accepting the responsibilities of a deputy.

"In short, instead of putting himself at the head of the people, he claims the privilege of putting his products upon their heads."—Chicago Herald.

Several Species of Fish Are Famed For Their Leaping Powers.

Jumping as a means of locomotion is shared by a variety of animals of widely different classes. Kangaroos and jerboas among the mammals, thrushes and robins among the birds, as well as such familiar forms as frogs, cockles, crickets and fleas all illustrate this proneness to leap, mostly as a means of getting quickly over the ground, and even lions and tigers, which never spring in ordinary circumstances, readily adopt this method of attacking their victims.

A considerable number of fishes are remarkable for their leaping powers, and several of these performers are on that account specially favored by anglers, since by jumping clear of the water in some cases many times in succession they tax the fisherman's skill more severely than fishes less active and therefore give added zest to their capture.

universally famous for their high jumps. The sea trout are unruly aerobats, and a fish of a pound weight will more than once jump several times its own length out of the water when hooked before coming to the net. At their best salmon can jump at least ten feet above the surface, a feat achieved by slapping the water with the powerful tail and flexing the body until the head and tail all but meet.—Philadelphia Ledger.

CALIFORNIA TO BE RULER OVER WAVES

New York, August 30.—The new battleship California will be the world's first electric dreadnaught and from point of size will be greater than any foreign battleship built or building. The California and her two sister ships, the Mississippi and the Idaho, already authorized, will each displace 32,000 tons, almost one thousand more than the new dreadnaught Pennsylvania now on the way to completion.

The California will be a ship of innovations. She will cost \$7,800,000 without her armor or armament, which is expected to cost as much more. She will have a speed of twenty-one knots an hour, will be 624 feet long, 97 feet across her beams and will draw 30 feet of water. She will carry twelve fourteen-inch guns, mounted three abreast in a turret, twenty-two five-inch rapid fire guns and will have four submerged torpedo tubes.

The principal feature of the new dreadnaught, however, is the machinery for propelling her by electricity. She will be driven by motors which will deliver electricity made by steam. The navy experts believe the electric installation is cheaper than steam propulsion and reduces the weight of machinery. The collier Jupiter has been so successful with electric machinery that the navy feels justified in adapting it to a dreadnaught.

Outwardly the California will bring a drastic change of line and appearance to the battlefleet. Instead of the blunt gray nose of the present day big fighter her bows will be tapered into a graceful yacht-like stem much like those of the famous clipper sailing ships that carried the American flag at the head of the world's swiftest craft in the 40's and 50's. It will be the first time since the steel ships replaced the old frigates and ships of the line that clipper stems have been seen in the fleet. Her overhanging bow will project more than twenty feet beyond her cutwater and will give place for three anchors instead of two as on the present ships. The third will hang plumb over the stem. The new bow will make for keeping the California a dry ship, as the sailors say, keeping her foredeck free of water in all but the heaviest weather. The fine underwater lines of the other ships which make for speed have been carried above the water line on the California and her bows will be flared near the deck line, so when she does not cut through a wave she will lift her head over it.

The model of the California's hull was thoroughly tested in the testing tank at the navy yard here before the radical changes were decided upon. When the new ship is ready for her first trial trip late in 1917 or 1918 she promises a most interesting study for the naval experts of the world.

TWO HURT WHEN CAR TURNS OVER

Laurel Allen, this city, sustained a broken collar bone, and Willard Wilson, colored, was bruised about the arm and shoulder, when an automobile, driven by Wilson, turned completely over on the national pike three miles east of West Jefferson, Saturday morning.

Four other occupants of the car were unhurt. The machine was badly damaged. Another auto picked up Allen and took him to Columbus for medical treatment.

Lee Barker, Dick Barker and Leo Burke, and a colored man whose name was not learned, all of this city, were the other members of the party, which was bound from the London fair to Columbus.

The cause of the accident is unknown. Wilson is said to have been driving at a brisk speed, when the machine suddenly reared into the air and turned over, pinning Allen, who was in the front seat, under it and throwing the others clear.

ATHLETICS TRIM CINCINNATI TEAM

Perkins' Campbells Get Short End of 8 to 1 Score - Locals Fatten Willow Record With Four Homers - Small Crowd - Linson Pitches Fine Game.

Cork Linson pitched the greatest game of his life Sunday afternoon for the Athletics, holding the Perkins' Campbells of Cincinnati to five scattered little hits and a lone run. Heavy hitting, which included four home runs, brought the Washington tally list up to eight. The game was tight with few errors. Threatening weather cut the attendance. Four hundred saw the game.

Of the five home runs during the game it may be said that three, those of Corwin, Lewis, and Newman of the Campbells, hit inside the field and rolled under the canvas. Those of Linson and Hungeling were clear liners, both dropping a considerable distance on the outside of the canvas.

The Campbells had a little hard luck getting their team in the field. Pfister, fielder, Popkins, first sacker and Gardner, pitcher, missed the train in Cincinnati, and Manager Becker was forced to run in subs, switch his lineup and himself take a hand in the game.

Saturday night Manager Noon of the Athletics received word from Spinnay, of Cincinnati, that Jack Reis, who was to have pitched his first game for Washington Sunday, had had the tip of a finger on his left hand cut off and couldn't play.

The Perkins, Campbells have been signed for another game here next Sunday afternoon, and a double header Monday afternoon, Labor Day. The Sunday game will start on schedule time. The first game Monday will start at 1:15 o'clock.

WEIGH THEIR HATS.

A Fad of Fussy Men Who Are Cranks in the Matter of Headwear.

In the back part of a Broadway hatter's store there is a pair of scales that are used only in the case of particular demands by particular customers. As a general thing you don't look for scales in a hatter's, and the proprietor explained his reason for having them in this way:

"You will often find very fussy men when it comes to buying a hat. With them the weight of headgear is of prime importance. An ounce more or less gives them the fidgets when they have made a rule of life to wear only such and such weights on their heads. So I keep the scales to convince them. It is well that I do. It has settled many an argument with a grouch and sold me many a hat.

"You may call them queer for wanting the exact weight they call for or within and not over that weight; but, come to think it over, they are not any queerer than the men who rush in here at the beginning of summer demanding summer headgear because they simply can't endure their heavy winter hats any longer.

"Well, they buy a straw and go away perfectly satisfied they are prepared for summer heat. And the hat they buy? Why, by actual weight on these very scales it often weighs two to four ounces more than the winter hat they have been wearing. One of our good customers has regularly shifted from a twelve ounce winter slouch to a fifteen ounce summer straw and has been happy in the change."

It is a fact, however, that thousands of men know the truth of what the Broadway hatter says, but still buy heavy straws.—New York Sun.

ESSENTIALS OF PITCHING.

First Comes Control, Then Knowledge of a Batter's Weakness.

"Control is the thing," say all the great pitchers, and all the great pitchers agree that a study of the batsman is next in importance. There are certain batters who can punish certain kinds of balls, while against a different style of pitching they are correspondingly weak. If a batter likes a fast ball at the waist line it becomes the duty of the wise pitcher never to give him a ball to his liking. Perhaps he is weak on a curve ball at the knee on the outside. The foxy pitcher makes a specialty of offering him that kind of delivery in abundance. In deciding what is best to pitch to the various batters a brainy catcher is of wonderful assistance.

Then, too, the pitcher must study situations. When he divines that a sacrifice is the play it is usually the best plan to keep the ball high. Such a ball is harder to meet squarely, while it is almost impossible to give it definite direction. On a low ball the skillful bunter can usually place it toward first or third, as is desired. For batters who have a tendency to pull away pitchers usually keep the ball on the outside, mostly depending on the curve. Seldom do batters who pull meet such balls squarely. As a rule they hit fast balls on the inside hard. The batter who hugs the plate closely and steps into the ball is bothered most by a fast ball on the inside, as it has a tendency to make him meet the ball on the handle, thereby losing most of the force he puts into the swing.

The pitcher must also take into consideration the position of his infield and must know who is covering the base on a throw, so that he may pitch to aid his infielders.—Billy Evans in St. Nicholas.

FOREIGN DEVILS.

The Answer a Chinese Official Gave a British Consul.

In his book "Home Life in China" Isaac Taylor Headland gives an account of the Chinese superstitions regarding the foreigner, one of which has resulted in their calling him Kuei-tzu, or "devil." A very amusing story, says he, is told of a red haired, red whiskered, blue eyed British consul at Canton who was, as are most of the British officials, of an investigative disposition and was anxious to know why it was that the Chinese call us of the west "foreign devils." Now he is understood that the Chinese idea of a demon is that he is a red haired, red bearded, blue eyed being who quails at nothing that comes in his way. One day when a Chinese official was calling on the consul the latter asked him:

"Why is it that the Chinese call us devils?"

The official at first hesitated, but, being pressed, he finally said, "I do not care to tell you."

"But I should take it as a great favor if you would tell me. I am very anxious to know."

"I cannot tell you," said the official.

"Why not?" asked the consul.

"Because you would be angry if I told you."

"By no means. I would not be so unreasonable as to ask you a question and then be offended because you answered it. On the other hand, I should be greatly obliged to you."

Being thus pressed until he was unable to refuse, the official finally eyed the consul from head to foot and said slowly and reluctantly, "Well, it is because you look like devils."

This natural superstition of the people was taken hold of by the Boxers in 1900 and circulated still more widely by all kinds of placards, both in prose and verse. I have one before me in verse, a part of which, translated, read as follows:

The devils are not human beings like you. If you doubt what I say You may see any day That the eyes of the devils in color are blue.

Height of Annoyance.

"I'm mad at my wife. To anger her I shall flirt with some other woman."

"If you want to make her absolutely furious ask some other woman to sew on a button for you."—Kansas City Journal.

Babies in Samoa.

Samoa's babies can give points to Europeans apparently. According to A. S. Middleton in "Sailor and Beachcomber," they are much prettier and very intelligent. Moreover:

They can swim at three months old, talk, run and sing at a year old, and if a Samoan had a child that sucked a dummy (presumably a comforter) at six years old and wailed driving along in its pram at an advanced age, as the children of the wealthy class of England do, they would look upon it as a great curio and smother it for shame on the first starless night.

John Bull.

The nickname John Bull is said to have appeared first in a satire by Dr. John Arbuthnot called "Law is a Bottomless Pit; or, the History of John Bull," published in 1721. Washington Irving mentions the typical figure as a "sturdy, corpulent, old fellow with a red waistcoat, leather breeches and short, oaken cudgel. Many Napoleonic caricatures show John Bull represented in this way.

## BERLIN BACKS UP HOLLWEG IN CONCILIATORY STATEMENT

Efforts Being Made to Drive Every Russian From Galicia, After Which, Critics Believe, a Tremendous Campaign in the West Will Be Opened -- British Steamer Torpedoed.

By Associated Press.  
Washington, August 30.—Concessions in the enforcement against American commerce of the British order in council, were announced today as a result of informal negotiations just completed by the foreign trade advisors of the State Department.

The British ambassador, Sir Cecil Spring-Rice, assured the trade advisors that their informal representations, in cases where the British orders have caused "undue hardship" to American commerce, will receive special consideration.

Berlin, August 30.—It is understood today that Germany's course with regard to the Arabic case has been decided upon, and that it is in line with the recent conciliatory statement by Dr. von Bethmann-Hollweg, the German chancellor.

This development followed the return to Berlin of the chancellor, Admiral von Tirpitz and other participants in the conference with the German emperor at his headquarters on the eastern front.

No official statement has been made.

London, August 30.—Reports from the eastern front indicate that the Austrians and Germans are engaged in an effort to clear the left corner of Galicia, still held by their opponents.

The Russian lines on the upper Bug and the Zlota Lipa have been pierced, but it is not yet clear what resistance is being offered to the vast enveloping movement from the south.

## OLD GLORY DOTS SEAS

By Associated Press.  
Washington, August 30.—Figures made public today by the Department of Commerce show the American flag now floats over more ships in foreign trade than at any other time since 1863.  
On June 30, 2,768 ships, totalling 1,813,000 tons, were registered, an increase of 363 ships and 737,000 tons for the year.

## NEW LAW REVAMPS THE JOBS

By Associated Press.  
Columbus, August 30.—Governor Willis today named as members of the new state civil service board, Z. B. Campbell, Ada, Republican, for four years; and S. D. Webb, Athens county, Democrat, for two years, under the Barnes-Moore civil service law, which went into effect last midnight, abolishing automatically the jobs of all public employees who had taken non-competitive examinations. The new commissioners will receive \$4,000 salary. Both had served on the old board, as appointees of Governor Willis.

Most employees in public service had to be reappointed provisionally today, to hold their jobs. Later they will have to take examinations in competition with outside applicants.

Former Attorney General Hogan expected to file suit late today, to test the validity of the new civil service law.

He alleges it was not passed correctly by both houses of the legislature.

## REVEALED BY FLASH

By Associated Press.

Toledo, August 30.—When Mrs. John Stader returned home from an automobile ride last night, she struck a match and an explosion of gas resulted. The flash revealed her husband, dead in a chair. He had turned on the gas and committed suicide. Mrs. Stader was burned slightly.

## SOLDIERS GUARDING JAILBIRD

By Associated Press.

Murphyboro, Ill., August 30.—Three companies of militia today guarded the jail here, to prevent carrying out of threats to lynch Joe DeBerry, negro, charged with murdering Mrs. James Martin.

He was smuggled here last night from the Harrisburg, Ill., jail, where a mob had formed.

Washington, August 30.—Small disorders in Cape Haitien last Saturday were reported today by Rear Admiral Caperton.

There really ought to be a letup on the trade embargo to the extent of letting the output of the world's toy shop, Germany, go its joyful way through the world. Of course toys are made in all countries, but Germany seems to have the monopoly of cheap playthings. Santa Claus and his millions of wards ought to be a favored class in this respect.

# PAVING WAY FOR PEACE PARLEYS

Officials' View of Germany's Change of Policy.

WILSON IN ROLE OF MEDIATOR

With Submarine Issue Disposed of the President is Expected Firmly to Assert the Rights of the United States Against British Violations of the Principle of Freedom of the Seas. Comment of Diplomats.

Washington, Aug. 30.—Officials in Washington think they can see in Germany's change of policy toward the submarine issue a larger purpose than the mere maintenance of friendly relations with this government. They believe that Germany, if not actually seeking to pave the way for peace negotiations, is at least preparing herself for the day when such negotiations will be begun.

The view that Germany is looking forward to possible peace developments from a settlement of the submarine issue is not mere surmise or speculation. It has a very substantial foundation in suggestions that have repeatedly been thrown out by German representatives in this country. Every since the submarine issue became acute they have urged informally upon Washington officials the great opportunity for a step in the direction of peace if the United States could only successfully mediate the submarine and blockade difficulties between Germany and Great Britain. It has been their contention that such an important step would probably prove to be only a beginning, and that the way would then be open for the United States to use its good offices in promoting a still broader understanding which eventually might result in peace.

Since the Arabic incident and the more conciliatory attitude of the German government toward the United States, talk along this line has been revived in German quarters here. Again the possibility of the president serving as a leader in the movement for peace is being held out.

Entirely aside from the German suggestions, officials here acknowledge that if the submarine issues is sufficiently disposed of, President Wilson will be much more available as a possible peace mediator than would otherwise have been the case. So long

as strained relations existed between this government and Germany the door was practically closed to President Wilson's attempting to play the important role of peacemaker in the European struggle.

There is no doubt here now that President Wilson is eagerly awaiting the opportunity to assert the rights of the United States against British violations of international law as firmly as he did against Germany. It can be said that he will move in this direction as soon as the submarine issue has been disposed of, and if he can bring Great Britain to make concessions, as Germany now seems disposed to make them, it is acknowledged here that he will be in the strongest possible position to offer his services as a mediator in the great war.

## CLEN DENNING IS ACCUSED

Columbus, Aug. 30.—In a statement given out here, Governor Willis charges Byron L. Clen Denning of Cincinnati, Democratic member of the state liquor license commission, with being connected with the McDermott liquor license ripper referendum movement. The governor is pushing the probe. He says: "I can not conceive of Republican appointees being so insincere or so far forgetting the party's pledges to the people as to become involved in such a movement as this, merely for the sake of saving a bit of patronage."

Charges that Governor Willis is informed of the fact that several of his appointees, including two Republican state license commissioners, are active in the effort to bring about a referendum on the McDermott liquor decentralizer, is contained in a statement issued by Democratic state headquarters. It was the Democratic answer to the Willis announcement. Governor Willis characterized the charges as false.

## TWO KILLED AT WAVERLY

Waverly, O., Aug. 30.—Two men killed and one seriously injured in the result of an automobile driver's effort to avoid striking a boy on a bicycle at a turn on the Scioto Trail, south of here: The dead: Howard Wardlaw, driver; John Hughes, Bert Lawson, another passenger, was severely crushed. The auto crashed into a tree.

**Young's Impromptu.**  
To most persons Edward Young is the author of "Night Thoughts" and nothing more, but he was also a man of the world and a shrewd and caustic wit as well as the rector of St. Mary's church at Weylyn.

It was there in the garden of the rectory that he composed some of the best impromptu verses known. He was walking with two ladies when some one summoned him to the house. His companions were agreeable, and he was in no haste to leave them. Turning as he reached the gate, he said: Thus Adam looked when from the garden driven And thus disputed orders sent from heaven.  
Like him, I go and yet to go am loath; Like him, I go, for angels drove us both. Hard was his fate, but mine still more unkind; His Eve went with him, but mine stays behind.  
—London Express.

**In the Dumps.**  
There was once upon a time an Egyptian king, so it is said, who built a pyramid and died of melancholy. His name was Dumops. The memory of his tragic history is perpetuated every time we say we are "in the dumps."

## PRESIDENT AND HOUSE BREAK?

Chicago, Aug. 30.—The Tribune prints the following: "Colonel Edward M. House of Houston, Tex., and the president have broken over the former's espousal of the claims to recognition made by General Carranza, head of the Constitutional party in Mexico. There was a break between John Lind, former governor of Minnesota and the president's first personal envoy to Mexico, over the same proposition."

## BURN NEGRO AT THE STAKE

Sulphur Springs, Tex., Aug. 30.—Revenge for the slaying of a deputy sheriff and the fatal wounding of Sheriff U. B. Butler was taken by a mob here when King Richmond, a negro, seriously wounded, and the body of his brother Joe, killed in a fight with a posse, were burned at the stake in Buford park.

## GOLD FIGURES

New York, Aug. 30.—A second record shipment of gold from London reached New York, eighteen days after the arrival of the first consignment of \$19,534,200. The latest gold shipment was a few thousands less. Ulysses S. Grant, acting assistant treasurer at the subtreasury in Wall street, gave the value of the consignment as \$19,530,000. Of the securities which formed a part of the shipment there were said to be \$25,000,000 of American shares held by British investors.

**Rules of the Game.**  
Industrial success is personal, not social. Society is not holding a man down; the existing social system is not keeping men at the bottom; it is their own personal deficiencies that keep them there. Industrial success can be won at a price, and the price is observance of the inevitable rules of the game—namely, sobriety, industry, saving, avoidance of speculation, knowledge of human nature, good judgment, common sense, persistence, intelligence and integrity. No social system ever keeps a man down who has these qualities. Is it not the best thing for the world to find out that industrial success can be won only by the display of these qualities?—J. Laurence Laughlin in Atlantic Monthly.

**Channel Island Currencies.**  
The currency system of the channel islands is complex. Both Jersey and Guernsey have a coinage of their own and in addition permit the free circulation of the coins of England and France. Guernsey's coins of copper, which include a half farthing, do not go higher in value than a penny, but pound notes are also issued. And if you take in Guernsey on the way back from a holiday in France you can have a mathematical morning calculating how to pay your bill, stated in English, in the coins of France and Guernsey, for which you will have no use in England.—London Spectator.

All quiet in financial circles, they say, except now and then a "missing cashier."

# SUFFETS TO UNITE IN BIG FIGHT

Demand Removal of Sex Qualification From the Ballot.

Washington, Aug. 30.—Next month women voters of the United States will meet at the Panama-Pacific exposition and go on record as favoring the Susan B. Anthony amendment to remove from the ballot the qualification of sex. Three months later, during the first week of December, the members of the Congressional union and their supporters will rally in Washington and make a great demonstration before congress.

More than 3,000 women will take part in the San Francisco convention. At least 5,000 suffragists, men and women, will gather in the national capital for the December meeting. In the various states woman suffrage workers are calling on their representatives in congress to assist them by word of mouth and votes in the session next winter.

"We are determined to win from a reluctant congress what will establish for all time to come our rights as citizens of the United States," said Miss Lucy Burns, vice president of the Congressional union. "We have listed more than half of the members of the present congress and by a file index can tell just where they stand. Before congress meets we will complete our poll and will be able to separate the sheep from the goats, or the wolves. Our efforts this summer have been to line up each and every congressman."

## COLUMBUS FALL FESTIVAL

Thrilling aeroplane flights, four immense parades, music, a carnival and other free attractions, for both day and night, have been provided for the entertainment of the thousands of the city's guests expected in Columbus during the four days of the Columbus Fall Festival, to be held September 15, 16, 17 and 18.

The Festival will be given under the auspices of more than 20 business civic, fraternal and other organizations, and the committee issues a general invitation to all Ohio to come to Columbus and enjoy four days of merrymaking. All entertainment provided by the committee is free.

On the evening of the opening day there will be held a "prosperity parade," in which have been entered more than 100 handsomely decorated floats, each in some manner symbolizing one of the various commercial, industrial or civic activities of the Capital City. The committee announces its belief that the prosperity parade will be the most pretentious pageant of its kind ever attempted in Ohio.

The second night will be featured by a special program of vocal and instrumental music in a great open air concert. The Columbus Oratorio Society, an organization with a wide reputation, will provide a chorus of more than 200 trained voices on this occasion.

A parade of elaborately decorated automobiles will be held the night of September 17, suitable prizes having been offered to insure keen competition in artistic decorations. The Festival will close the night of September 18 with a grand mask carnival in the downtown section of the city.

DeLloyd Thompson, conceded to be one of the world's greatest aviators, has been engaged to give flights each day. High over the business section of Columbus, he will perform the loop the loop, fly upside down and perform one feat that has never been accomplished by any other living aviator, the "tumble flight," in which his machine rolls end over end, side over side and defies the law of gravity.

## TWO POWDER MILLS BLOWN

Wilmington, Del., Aug. 30.—Two black powder mills of the Dupont Powder company at the Upper Hagley yards, near this city, on Brandywine creek, exploded with terrific reports. Lawrence Cunningham and John Gillespie, unmarried, were instantly killed. The cause of the explosion has not been determined.

Several hundred pounds of powder of a powerful brand were stored in each mill. The first to explode was a fuse plant, which caused the explosion of the second mill, near by. The two victims were employed in the first mill. Both mills were destroyed, being swept clean of their foundations. The force of the explosion hurled pieces of machinery, shafting and large stones for a great distance in every direction. Trees were uprooted or twisted as though a tornado had struck them. Houses shook in all parts of this city, four miles away, while the property damage near the mills was considerable.

## WOMEN FIGHT DUEL FOR MAN

Los Angeles, Aug. 30.—In a grim duel for the love of a man, carried on in a candle lighted cellar of an apartment house, two women were so badly cut by the ten-inch knives they used that both will probably die. The women, Mrs. Luerda Jaques, twenty-eight, and Mrs. Mary Gonzales, forty, were hurried to the receiving hospital, both bleeding copiously from severed arteries. According to the incoherent stories told by the dying women, they fought over a certain Juan Perez, a handsome Mexican. The two women stripped to the waist. Each was armed with a ten-inch knife. Circling about like cats, they fought fiercely.

**Tripoli's Scottish Admiral.**  
Tripoli has long had a bad reputation, but reached the zenith of offensiveness a century ago, when its private fleet was organized by a renegade Scotchman, Peter Lyste. He did a deal of mischief, but came to a bad end.—London Standard.

## A Startling Presentation

The announcement carried in the news dispatches of Sunday's metropolitan press, that the diplomatic negotiations now pending between the United States and Germany, growing out of the sinking of the Lusitania and the Arabic, in both of which tragedies American lives were lost, may lead, ultimately, to a termination of the great European war, was startling.

The publication of those dispatches has, even granting that it had no more substantial foundation than the remarkable ability of a good news writer and a good news "maker," has set people to thinking and, if they were not cognizant before of the tremendous issues and possibilities involved in the discussion, even the diplomats must realize now that an avenue which leads to peace has been opened.

The story of the dispatches and the theory which the news writer has bared to public gaze is so entirely probable and the way to peace is pointed out with such precision and in such an amazingly simple manner that many people believe, and all hope, that the happening of the contingency pointed out may have been intended by the diplomats of this nation and Germany at the inception of the discussion.

Should the discussion finally resolve itself into an open acknowledgment of both governments guaranteeing the freedom of the seas there is nothing left to be done save for this nation to open a diplomatic discussion with England looking to securing the acknowledgment by that government of the principles contended for and agreed to by both Germany and the United States.

This, in effect, means that Germany and Great Britain accept the proffered service of the United States as mediator in an endeavor to bring Germany and Great Britain to an agreement regarding the main cause of the war. With such an agreement consummated between Germany and Great Britain through the mediation of the government of the United States, the cause of war being removed, peace would be assured and the diplomats of this nation would take first rank among those human beings through whose efforts the destinies of nations are wrought out.

Germany, it is stated as a fact, has been ready to accept every offer and every demand made by this nation in the final note in the discussion following the sinking of the Lusitania, and would have done so before this time but for the sinking of the Arabic.

When Germany does that, it is plain that she has acknowledged the claim of this nation for freedom of the sea and has also accepted the proffer of this government to act as mediator in an endeavor to bring an end to the greatest and bloodiest war of all times.

The surprise of the people when the possibilities of the present discussion were first indicated has been replaced by the sincere belief that official Washington will not allow the opportunity to pass by ungrasped.

The present situation may have developed without the intent of the president and his assistants, or it may have been their purpose from the outset to bring the discussion to the very situation it now presents. If the latter is true, President Wilson and his advisors must be given credit for being the greatest diplomats of all time.

Whether it was design or the stronger power which shapes the destinies of man is not, at this time, so important.

Whether the news dispatches were based on the present knowledge and intention of diplomats is not now important.

The opportunity is here and it is safe to say that every advantage which it affords in the way of bringing peace to Europe will be made to yield its full measure of results.

## America's Military Defenses Inadequate to Cope With a First Class Power

By JACOB M. DICKINSON, Former Secretary of War

It is no departure from our traditional advocacy of peace to inform ourselves of our military status or to prepare ourselves to resist invasion or to protect our citizens in their just rights of person and property. If these things be militaristic then I am militaristic. The truth is that the time has not come when we can dispense with armament; THAT AT PRESENT, WITHOUT REGARD TO THE ATTITUDE OF THE WARRING NATIONS, OUR ARMY AND NAVY DEFENSES ARE WHOLLY INADEQUATE FOR WAR WITH ANY FIRST CLASS POWER OR EVEN FOR DEFENSE AGAINST AGGRESSION.

We never have had, and unless overpowering necessity forces it upon them, our people never will tolerate, a large standing army, but we must be prepared to resist unjust aggression. By shorter enlistments and passing men through the army into civil life subject to call we could largely increase our available force in a few years. Many more trained officers could be graduated from West Point, many more in any case than we need in times of peace, and the surplus passing into civil life subject to call could build up a corps to be relied upon in case of necessity.

OUR NATIONAL GUARD COULD BE VASTLY IMPROVED; PROPER STORES AND EQUIPMENT COULD BE PROVIDED. ALL THIS COULD AND SHOULD BE DONE.

## Poetry For Today

## A COUNTRY SCHOOLHOUSE.

Lo, guarding their treasure-heaps of corn,  
The great barns shoulder the mists of morn;  
One after one, in their sheltering groves,  
Are homes this neighbor and that one loves;  
The very cattle keep prosperous state;  
No time-wrecked timbers or sagging gate  
To render their keeping less secure;  
Watched and guarded, early and late,  
The farmstead's care is sure.

But what is the building down the hill—  
The narrow room, with a broken sill;  
With streaks of rust on the crumbling brick;  
Its bleak-eyed doorway braced by a stick?  
There are broken seats within, and look  
Where one rent, grimy, battered book  
Proclaims thru its grime that living thought  
Some purpose dim to this place has brought.  
A jester wandering by—some fool—  
Dared call this the neighborhood's country school.

Shame! Shame upon us, if this should be  
The only house they could build for thee—  
For thee, thou hope of a yearning race,  
Thou, newly ventured from Love's embrace  
In the light of thy parents' smiles and tears;  
Prayer of the struggling pioneers,  
Who fought their fight with the stubborn soil  
And bore their meed of relentless toil  
To free thy soul in the coming years!

Look, child of the brave New World, and see  
The fitting shrine of thy spirit free!  
Lo, its bell shall ring thee more gladness still,  
Its beauty waken thine ardent will.  
It shall shine afar like thy guiding star  
At its open gate shall thy future wait!

But slowly wakeneth the people's strength  
While that cumbereth the ground which shall fall at length,  
—Yet prisoneth spirits that should be free  
And blighteth the promise of infancy.  
—Florence A. Kellogg, Delaware, O.

You can make a woman madder by ignoring her than you can by calling her names.

When a girl marries she usually loses a good friend and gets a grouchy boarder.

Politics is one of our most popular sports because you can talk it all day and not know a blame thing about it. When they are engaged they imagine that they can get along with one chair when they go to housekeeping. But after they have been married for awhile they want two different bedroom suits.

The lad who loafs around and owes everybody in town is the same fellow who is deeply worried because the Panama canal isn't paying expenses.

The old fashioned poker player who used to walk around his chair to change his luck now has a son who can deal a diamond from the bottom when his stack gets low.

Before he gets her he thinks she is a hummingbird. After he gets her he discovers that she is a screech owl. Conscience may help some. But the fear of getting caught is what keeps most of us straight.

A woman may have no aim in life. But she always seems to hit the target when she starts out to shoot Friend Husband.

There isn't any fun in fishing if you have to catch fish for a living.

Before she gets him she believes all he tells her about his prowess as an athlete. After she gets him she discovers that about the only sport he excels in is throwing the bull.

Once in awhile father will play foxy when he comes home with a fine bun on, and he will carefully hide his money so mother won't find it, and then he will get up with a big head and a dazed feeling and stall around for an hour trying to remember where he hid the blame money.

Most of the men who are seeking positions are dodging jobs.

## DEFIED THE AUDIENCE.

Then the Audience Forced Adelaide Neilson to Surrender.

In "Forty Years On the Stage" the author, John H. Barnes, an old time actor, has this to say of Adelaide Neilson, the once famous star:

"One quite extraordinary gift she had—namely, that of tears. At any given moment or cue she could make the tears mount to her eyes and even run down her cheeks irrespective of anything she was feeling at the time. It almost resembled the turning on of a tap. Undoubtedly she had great beauty—wonderful eyes and an expressive mouth, fine coloring of complexion and hair and a rather spare figure.

"Her appearance suggested a woman of Spanish or Italian type. As a matter of fact she was born of humble parents in a village in Yorkshire in 1848, and her real name was Elizabeth Ann Brown. In her youth she was by turns a mill hand at Gulseley (Yorks), a nursemaid and a barnmaid, so the strenuous life she must have led to raise herself to the position she eventually attained may be imagined."

An example of the temper that sometimes flared from behind the Neilson beauty is included in this passage:

"A curious incident occurred in Baltimore. The play was 'As You Like It.' Milnes Leveik played Jacques and had spoken the 'Seven Ages' speech very finely, gaining tremendous applause at the end. Miss Neilson (as far as I know without intent) said, 'Go on, go on,' and the scene was taken up before the applause died down.

"The audience got annoyed and seemed to feel that it was being treated scurvily and kept up the applause in a manner which stopped the play. Miss Neilson ordered the curtain to be rung down, and then the storm burst out. It became a battle royal between her and the audience, who simply declined to listen to a word until Mr. Leveik had repeated the speech. A silly scene, which might have been avoided, but became an absolute deadlock, out of which there was only one way. The audience was master of the situation."

## LOVE LINKED WITH DEATH.

Where Women Propose and if Rejected Must Kill Themselves.

In the Pacific ocean, between Fiji, New Guinea, New Caledonia and the continent of Australia, lies the Melanesian group of islands, where head hunters and cannibals abound. Strange and gruesome as are many of the customs of the tribes, there are some that are most romantic. For instance, on the island of Tucopia the women propose marriage instead of the men.

When a girl of Tucopia sees a man whom she thinks she would like to have for her husband she does not rush up to him and ask him to marry her. On the contrary, she gives the subject deep thought and often the man a most careful investigation before she "pops the question." The reason is that his answer spells life or death to her.

It is a tribal law that any woman who has been refused must forthwith kill herself. Therefore a woman asks a man's hand only when she feels sure that his answer will be the happy one.

Many are the strange and seemingly inexplicable questions with which the women of Tucopia ply the stranger who cannot realize the personal motive back of the solicitude of the dusky belles who inquire if he is married or not and the state of his wife's health. Romances are consequently very apt to turn out in happy marriage.

But there have been innumerable instances when a poor girl, smitten by the newcomer's charms, has been compelled to kill herself because the man with whom she has fallen in love has had to refuse to marry her.

Baldness with the women of Tucopia is a sign of beauty, and never until she is bald does a Tucopia woman become fully convinced that she is really lovely.

But, bald or not, she takes great care whom she asks to marry her, for the tribal law has never been known to fail. If a rejected woman does not kill herself she is executed under the most dishonorable conditions by the leaders of the tribe.—Buffalo News.

We don't need a thermometer to show us when it is hot enough to set the political pot to boiling.

## The Warsaw campaign should be full

of lessons for juniors in the general staff corps of all armies. The real whys and wherefores will not be known until we have official reports from opposing commanders. The Russians will argue that Warsaw is no great gain for the kaiser and had the Germans been hurled back finally from the very gates, as they were temporarily in October last year, they might have contended that it was no great loss. So long as the Germans were well up in front of it with trenches and big guns they could keep up a clatter and force the enemy to retain troops there which were needed for their campaigns north in East Prussia or south in Galicia. Under cover of a pretended lunge on Warsaw last winter they surprised and routed a large Russian column in East Prussia. And all the time the Russians were forging west toward Cracow, in Galicia, and south over the mountains toward Hungary they had the enemy on the flank and rear, prepared possibly to drive on past Warsaw and cut communications with the Russian bases. The Warsaw campaign may not prove decisive on a vital scale, but is a military marvel perhaps unequalled.

# STREET CAR CRASHES INTO HAGLER MACHINE

Five Fayette County Persons Are Injured, None Dangerously It Is Thought, in Accident on North High Street, Columbus, Sunday Afternoon.

## THREE OF VICTIMS TAKEN TO HOSPITAL

Howard Hagler, Alone, of Six Persons in the Car, Escapes Unharmed—Crash Occurs When Driver Attempts to Cross Street Behind One Street Car, Only to Enter Path of Another From Opposite Direction.

**The Injured.**  
Mrs. Roy Hagler, Hagler's Station, cut and bruised.  
Miss Mary Robinson, Circle Avenue, teeth knocked loose and face and body bruised and cut.  
Alfred Hagler, 8, son of Roy Hagler, bruised.  
Miss Maggie Clemens, bruised.  
Grove Davis, son of Mr. and Mrs. Ben Davis, aged 11, bruised.

Six persons, two of them children, barely escaped violent deaths in Columbus late Sunday afternoon, when a High street car, southbound, struck the automobile in which they were riding. The accident occurred at a point on High street between Spruce and Goodale streets.

Of the six occupants of the car, Howard Hagler, owner and driver of the machine, alone escaped unharmed. The others were cut and bruised but none critically injured. It was believed early Monday. The automobile was wrecked.

Mrs. Hagler, Miss Robinson and Miss Clemens were taken immediately after the accident to Protestant Hospital. The children were taken to the home of Mrs. Luella Herbert, sister of Mrs. Hagler and Miss Robinson, in Columbus.

Relatives here were in telephone communication with Mr. Howard Hagler Sunday evening. He stated that the condition of none of the women was regarded as serious at the hospital and expected that Mrs. Hagler and Miss Robinson would be able to leave the hospital Monday evening. Miss Clemens, however, may remain at the institution several days.

The severe shock was the most important result of the accident. The children were the least hurt of the injured people.

The party had left here early Sunday afternoon and was just going into Columbus when the accident occurred. They had intended to visit the state fair and had arranged to meet Mr. Roy Hagler, who, with his son Jesse and daughters Ruth and Mary had motored up earlier to look after his exhibits.

Mr. Hagler was driving north on High street. It is said the accident occurred when he attempted to drive from the east to the west side of the street, going around a northbound street car only to be caught squarely in the track by another going south.

# B. & O. OFFICIALS GETTING RIGHT DOWN TO BUSINESS

A. Thornton & Son Receive Telegram From Headquarters, Requesting Them to Vacate Their Coal Yard, Situated on the Railroad's Property, Within 30 Days.

That the B. & O. Railroad is making a sincere effort to carry out its promise to have a new depot in Washington C. H. "before the snow flies," is indicated by a telegram received by A. Thornton & Son, whose

coal yard is located on B. & O. property, between Temple and Paint streets.

The telegram requests that the property be vacated within thirty days.

On the heels of the telegram came Chief Engineer Gabriel, of Chillicothe, with a crew of assistants, who immediately engaged in surveying the property.

The engineers have been busy at work all day.

The Thornton company has taken steps to vacate, but has not yet announced its new location.

## POLICE ARREST BOYS WHO STOLE BICYCLE

Acting Chief of Police Baughn Sunday arrested Arthur Beatman, 16, and Marvin Church, 17, who confessed to stealing a bicycle from Clyde Woody, Friday night and selling it in Xenia. They said they rode the wheel to Xenia Saturday.

The lads were severely reprimanded by Mayor Coffey and will be forced to make restitution.

## ANNUAL CONVENTION CONVENES WEDNESDAY

The 38th annual convention of the Woman's Christian Temperance Union will be held in the First Baptist church on Wednesday, September 1.

Mrs. Stella Snodgrass, of Xenia, State Lecturer, will have charge of the day's program and also delivers a

lecture at the same church the evening of August 31st. Her subject "Finger Points upon the Nation."

Mrs. Snodgrass has been a Red Cross nurse and worked in the slums of Chicago and brings a message of great interest.

The public is cordially invited to attend.

## ALLEN RECRUITING HORSES AT EXPO.

Mr. Charles Allen left Monday morning for Columbus, where he will look over the state fair horse exhibits with a view to securing some Ohio equine for exhibition at the Panama-Pacific exposition. Mr. Allen is a member of the Ohio commission to the big fair.

It is probable that animals from the Hagler and Jones stables, this county, will be included in the choice as these horses are regarded as among the best in the state.

## KEYNOTE OF DRY CAMPAIGN

Dr. A. C. Bane of California, National organizer of the Anti-Saloon League, and Col. Worthington Lutzman, former adjutant general, now state county organizer of the league addressed an audience in which all the city churches were represented, at Grace church Sunday night in the interest of the dry forces of Fayette county organizing for the coming election.

Fayette is one of the three last counties in the state to organize for the work of stirring to fresh activity temperance sentiment and crystallize it into votes for state prohibition this fall. A county executive committee was appointed some time ago but has been unable to secure the necessary head for the success of the work.

Rev. Wm. Boynton Gage, pastor of the Presbyterian church, presided. Dr. Bane is a brilliant orator and made astonishing statements in regard to the spreading of pro-temperance sentiment throughout the nation.

The speaker cited the terrific progress of the last thirteen years, during which each day had averaged the driving out of 46 saloons. He said that by the first of next January 85 per cent of the territory in the United States would be dry and the saloon was already penned up in a few of the largest centers.

Dr. Bane claimed that Cincinnati's failure to secure the Regional Bank was due to the fact that examiners found that 40 per cent of the securities of the Queen City banks was in distillery stock.

The second speaker took up the discussion of the financial end of the coming campaign. Owing to the large extent of wet sentiment in big cities and the labor troubles which were impoverishing certain Ohio counties, he urged the necessity of counties that had long been dry like Fayette, coming to the rescue with generous donations.

Following the speeches action was taken endorsing the present county temperance executive committee and urging the securing of a secretary at once.

The committee will hold a meeting for that purpose tonight.

## DEATHS AND FUNERALS

**GAULT**—Nela Mary Gault, aged 1 year, daughter of Wm. P. Gault, died Sunday evening at 8 o'clock, at the residence near Eber. Funeral services will be held Tuesday at 1:30 p. m. at residence. Burial will be made in Bloomingburg cemetery.

## RESIGNATION IN EFFECT

Mr. J. G. Williams' resignation as Union township trustee took effect Monday and Mr. A. T. Vincent was appointed to fill the vacancy on the board.

Mr. Williams is one of the new commissioners who enter upon their duties early in September.

## CARNIVAL ARRIVES

The Ferarri Shows United, showing here this week in connection with the Odd Fellows' Fall Festival, arrived in the city Sunday and unloaded their huge equipment at the Hagler field on South Main street.

## MIGHTY HEIRONIMUS IS BADLY BATTERED

The Wilmington Clintons came in for a sorry defeat in Cincinnati Sunday, at the hands of the Avondale ball club. The Queen Citizens got into Mighty Heironimus for seventeen hits and took five walks on his wild ones.

The score stood 13 to 4 for Avondale in the eighth inning, when the game was called on account of rain. Swain, who umpired part of the Wilmington-Washington series, did the refereeing.

The Clinton lineup was minus Chapman and Mooremen.

## WILMINGTON WILLING FOR ANOTHER SERIES

Although Manager Noon has not had a face to face talk with the Wilmington ball club management, he learned Saturday from the camp of

the Clintons that the latter team is agreeable to another series, and is ready to start a week from Sunday at Wilmington.

Before anything definite is arranged, however, Captain Runnells will make a trip to Cincinnati, to look over some pitching material. Runnells will go to Cincinnati Tuesday.

## WOODLAND STARTING AT NAPOLEON FAIR

Frank Woodland, of the Horse Journal, left Monday for Napoleon, O., where he has been engaged as starter for the annual Henry county fair races this week.

W. F. M. S.

Meeting of W. F. M. S. will be held Tuesday, at 2:30 p. m. in the church parlors. The officers will act as hostesses. Annual mite box opening and election of officers. The last meeting of the conference year. Let every member be present. Note change of day from Wednesday to Tuesday.

By Roy Norton. A thrilling drama of love—the lust for gold and deadly hatred. The bare fist fight in this picture is positively the greatest fight that was ever staged on or off the screen. This picture is said by New York critics to be equal to "The Spoilers," if not better. It is the kind of a play that shows Mr. Farnum at his best. The exterior scenes were taken in and around the great Coeur D'Alene Range, which is noted for its beautiful scenery. All in all this picture is the event of the season. Below is a good likeness of William Farnum, and was taken from the character Big Bill Matthews, which he portrays in "The Plunderer."

Progress Made In All Sectors of Eastern Line Save Courland.

TEUTONS APPROACHING VILNA

Mid-October Chosen as the Time For the Long Postponed Offensive of the Allies on the Western Front. Speculation Rife as to Future Movements of the Germans—No Signs of Letup in Teutonic Drive in Russia.

London, Aug. 30.—There are no signs yet of any slackening of the German pursuit of the retreating Russians, and according to the official report issued in Berlin, progress has been made in all sectors of the eastern battle line except that in northern Courland, where the armies of Grand Duke Nicholas are offering a stubborn and effective resistance.

From the southeast of Kovno, where the Germans claim to have broken the Russian resistance and must, therefore, be approaching Vilna, along the Niemen to Grodno and thence southward through the forest of Bieloviez and along the borders of the Pripiet river marshes, the Russians are falling back to new positions.

Speculation again is being indulged in as to whether the Germans intend to follow the Russians farther or prepare positions from which they can hold the Muscovites, while the Teutons attempt an offensive in the Balkans or on the western line in France and Belgium. Military observers here are of the opinion that this question must be settled before many days have elapsed, arguing that with the summer coming to an end any ventures proposed for the fall must soon commence to develop.

Thus far the Germans have made no move toward a great offensive in the west, and the threatened Austrian attack against Serbia has consisted mainly of long distance artillery engagements. It is being vaguely hinted here that mid-October has been chosen as the time for the long postponed "big push" of the allies, but the point at which an attack is to take place is not being mentioned. The general public does not expect a strong offensive movement as yet, but in some circles there would be no surprise should General Joffre, the French commander in chief, find it possible to attempt some kind of a forward move before mid-October.

## BULGARIA SLOWS UP

London, Aug. 30.—The allies have served an ultimatum on Bulgaria that signing of the proposed treaty with Turkey would be considered an unfriendly act. It is semi-officially reported by the Berlin Overseas News agency. Although Bulgaria previously was reported to have signed the pact with the Ottoman empire, ratification has been postponed because of this sharp warning.

It is reported that General Rostanov has been seriously wounded while leading a successful attack against Austrian positions.

Pope Benedict visited incognito the wounded soldiers in the Santa Marta hospital, adjoining the vatican. The pope was visibly moved as he walked among the many beds, stopping to speak to some of the men. He took notes and distributed money.

## MURDER CHARGE

Gary, Ind., Aug. 30.—That Theodore Rocoff, a wealthy Gary banker and real estate owner, supposed to have been drowned in the lake at Miller Beach on Sunday, Aug. 1, in reality was murdered by persons in the water with him and before 2,000 bathers, was the starting statement made by Mrs. H. H. Ballard, who with her son Hugh was at the beach at the time Rocoff met his death. According to the story of Mrs. Ballard, her son saw three men, all foreigners, strangle Rocoff and push him under the water.

## QUAKES IN ITALY

Rome, Aug. 30.—In the Avezzano district violent earthquake shocks during the last twenty-four hours caused a great panic. The new anti-seismic dwellings which were erected after the recent earthquake prevented a repetition of that catastrophe.

On the morning of Jan. 13 last an earthquake that lasted thirty-four seconds laid waste a large section of central Italy, killing 36,000, injuring as many and destroying fifty towns and villages. The panic it caused was unparalleled in the history of Italy and was second only in the number of its victims to the upheaval that destroyed Messina and Reggio in 1908.

## What Causes Tuberculosis?

THERE can be no tuberculosis without the germ, the tubercle bacillus. Whether the disease appears in the lungs, in the hand, in the hips, or in the eye, it is the same germ that always causes it.

Looking at it from another way, however, the germ of tuberculosis can never cause the disease unless the soil has been prepared for it. It is as if the germ were the seed and the body were the soil. You cannot raise wheat on a hard, cobblestone pavement nor can you grow corn on a boardwalk. Neither can you grow tuberculosis from the tiny plant-like germ which causes the disease, on a soil which is hard and resistant. The tissues of the body in which the disease is to develop must first be weakened and made flabby and prepared for the growth of the disease somewhat as the farmer prepares his soil before sowing his seed.

What are the causes that prepare the soil for the growth of tuberculosis germs in the body? There are first of all, a group of causes which lie within the individual himself, which we may call personal causes. Some of them may be controlled by the individual and some of them are beyond his control. Take such causes, for example, as intemperance, lack of proper food, a weakened physical condition caused by grippe, colds, pneumonia, measles, typhoid fever, etc.—these are some of the personal causes which prepare the soil for the tuberculous seed. Then there is also another group of causes which are entirely outside of the individual and which we may designate as environmental or social causes. Some of these are, for example, bad living and working conditions, lack of play and recreation facilities, unclean streets, etc.

These two groups of causes may either separately or altogether, act upon one so that his normal strength and vitality, which we call resistance, is lowered and he readily becomes a prey to the disease germs which are constantly lurking about and which he may be harboring in his body without knowing it. Let us consider some of these causes a little more in detail.

Of the personal causes that lead to tuberculosis, probably intemperance may be reckoned as one of the most important. By intemperance is meant everything in the way of self indulgence that injures the body. One may be intemperate in eating and by partaking of too much food may produce permanent digestive disturbance which weakens the bodily resistance. One may be intemperate in the use of drugs or in other ways, thereby weakening the bodily resistance. The most frequent form of intemperance, however, is the use of intoxicating liquors. Any man who drinks beer, wine or whiskey to excess is preparing the soil of his lungs for the seed of tuberculosis. This is the reason why the mortality from tuberculosis among men and women who are accustomed to drink is so high, much higher according to reliable statistics than among people who do not use intoxicating liquors.

Many children from the time they are born into the world are doomed to starvation. Other people because they like candy, pie, and cake better than meat, bread, and vegetables, are starving themselves willfully. This underfeeding or lack of proper food will as surely prepare the soil for tuberculosis as if one deliberately set out to do so.

Many people have a notion that if they have apparently recovered from a bad cold or an attack of grippe or pneumonia, there is no further danger and they are perfectly safe. Oftentimes the most dangerous period in an acute disease is during the few weeks immediately after the patient is able to be up and about. It is during this time of convalescence that the seeds of disease will find a sure root if special care is not taken. Fresh air, good food, rest, and right living are the best safeguards against tuberculosis during a time such as this. The after-effects of many diseases can be avoided if the patient will continue to persist in taking care of himself just the same as he did when he was in the bed and under the doctor's orders.

Then there are those causes of tuberculosis which are entirely outside of the individual such as bad housing conditions. Dark rooms where the sun never shines are among the best breeding places possible for the germs of tuberculosis. Here they thrive in great quantities and it is almost impossible to dislodge them. Dark, filthy hallways, unclean sinks, and dirty backyards and toilets are also menaces to the health of those who live near them. Many a man can improve these conditions with a little effort if he will take the time to do so. More often, however, it is the landlord's fault that the housing conditions are not better.

Low wages, long hours of work, dark unventilated factory rooms, excessive heat, and dusty occupations are only a few of the conditions which make it easy for the seed of tuberculosis to attack the working man. The lack of proper places for play and recreation, which makes a man go to the saloon at night instead of into the park or playground, is a social cause leading to tuberculosis. These social causes can be fought only by the united effort of the men and women of the community. Individuals can help but it takes all shoulders at the wheel to produce effective results.

In conclusion, remember that the soil must be right before the seed of tuberculosis can grow, and that you can contribute much towards keeping the soil of your body in such condition that no germs will find a root there.

## Newspaper Advertising

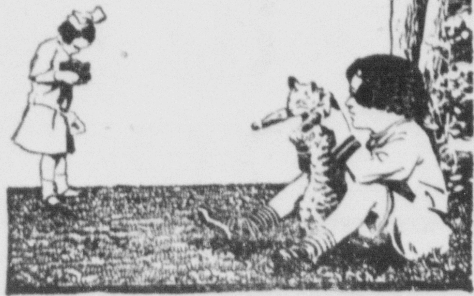

Goes direct to the people and the people constitute the buying public. Newspaper advertising not only talks but it emphasizes; it has the undivided attention of the reader and covers a field no salesman can hope to reach. There are many styles in newspaper advertising and the small announcement, which costs only five cents, is just as effective in its way as the larger one, which costs proportionately more. The benefits to be derived can not be measured by the size of the ad, for the very good reason that the small, inexpensive announcement invariably proves effective. Newspaper advertising costs from five cents up to any price the advertiser desires to pay.

# CLAIM THOUSAND CANADIANS LOST

Passengers on Holland Liner Say British Transport Was Sunk.

TORPEDOED BY A SUBMARINE

Disaster Said to Have Occurred Off the Scilly Islands on August 15—No Hint From British Sources in Substantiation of the Story—Transport Carried Two Thousand Men, Bound For Western War Zone.

New York, Aug. 30.—One thousand Canadian troops were lost when a British transport with 2,000 Canadian soldiers on board was torpedoed by a German submarine off the Scilly Islands on Aug. 15. Such is the substance of a wireless dispatch received at Sayville from Berlin. Passengers on the Holland-American line steamer Ryndam brought in the report. The Scilly Islands lie off the southwest coast of England, near the line of steamship traffic between New

York and Southampton. German submarines have been active in these waters. Movements of transports are kept secret by the British admiralty, so that there has been no information to indicate whether a Canadian troop ship was in the vicinity of the Scilly Islands on the date mentioned.

No hint has come from British sources of the foregoing report. While it is possible that, had such an event occurred, the British censors might have withheld the news, this is improbable in view of the fact that official announcement was made promptly of the torpedoing of the British transport Royal Edward in the Aegean sea with the loss of about 1,000 men. The Royal Edward was sunk on Aug. 14, one day before the date mentioned in the wireless dispatch from Berlin, and it is possible that the report brought in by the Ryndam's passengers is a garbled version of this incident.

## STORY DENIED

Ottawa, Aug. 30.—The report that a Canadian troop transport had been sunk off the Scilly Islands was officially denied here.

## BELGIUM PROBLEM GROWING

Eighty Million Dollars' Worth of Food Sent By America.

New York, Aug. 30.—Since the first cry of homeless Belgian women and children reached across the seas America has sent \$80,000,000 worth of food to the war-ridden little kingdom, according to the latest report of the commission for relief in Belgium. Including the grain and foodstuffs sent from the United States alone, this report shows the shipments have reached a total of 458,216 tons. If the shipments from Canada and other countries were to be added, the commission estimates the aggregate probably would exceed 2,000,000,000 pounds.

A shipload of food every forty-eight hours was necessary during the winter and spring to feed the Belgian population of 7,000,000 on a per capita ration of ten ounces a day, about one-third of a soldier's ration. During the summer the requirements of Belgium were considerably lessened as a result of the German military authorities conceding to the Belgians their grain crops, and this greatly facilitated the commission's work. With the approach of the winter months the commission expects the Belgian needs to become again greatly increased, and urges generous financial support.

#### POLITICS AND BUSINESS.

A Sample of How Cleverly They Are Mixed In France.

Politicians of the United States are supposed to be gifted above those of all other countries in the art of self advertisement, but it is doubtful whether any of our politicians are more adroit in this respect than certain Frenchmen. Witness, for example, the following announcement, published in the newspapers of Paris:

#### "GENERAL ELECTION.

"To the Electors of the Steenth Arrondissement, City of Paris: The undersigned appreciates the flattering desire of many of his fellow citizens that he should represent this arrondissement in the chamber of deputies. Always proud to feel himself in accord with his fellow citizens, he is convinced that he would represent them faithfully and that his nomination would be equivalent to an election.

"Fully appreciating this fact and thanking the citizens of the Steenth arrondissement for their confidence so generously bestowed, he begs leave, nevertheless, to announce that the great increase in his business as a dealer in hats at 1000 Rue de Marseilles fully occupies his time and attention and that his service to the public at this well known establishment will unfortunately prevent him from accepting the responsibilities of a deputy.

"In short, instead of putting himself at the head of the people, he claims the privilege of putting his products upon their heads."—Chicago Herald.

## 10,000 RUSSIANS MADE PRISONERS

Vienna, Aug. 30.—The Russian hold on the last part of Galicia seems to have been completely broken by the Austro-German offensive begun in this region Friday. The war office reports that the Russian line on a front of 160 miles has broken down, that the Russians are in retreat and that during the first two days' fighting of the new campaign 10,000 prisoners were made. The new attack is over a front reaching from Wladimir-Wolinsky, a few miles north of the Galician border, in Russia, to a point 160 miles south. The advances indicated by the war office in its statement show that already the Russians have been driven back for a distance varying from fifteen to twenty miles.

## ALLIES REPULSED

Constantinople, Aug. 30.—The war office told of general attacks by the allies from the Sulva bay district to Avri Burnu. All of them were repulsed, and a cruiser and a transport which came within range of Turkish artillery were hit several times.

#### JUMPING ANIMALS.

Several Species of Fish Are Famed For Their Leaping Powers.

Jumping as a means of locomotion is shared by a variety of animals of widely different classes. Kangaroos and jerboas among the mammals, thrushes and robins among the birds as well as such familiar forms as frogs, cockles, crickets and fleas all illustrate this proneness to leap, mostly as a means of getting quickly over the ground, and even lions and tigers, which never spring in ordinary circumstances, readily adopt this method of attacking their victims.

A considerable number of fishes are remarkable for their leaping powers, and several of these performers are on that account specially favored by anglers, since by jumping clear of the water in some cases many times in succession they tax the fisherman's skill more severely than fishes less active and therefore give added zest to their capture.

universally famous for their high jumps. The sea trout are untiring acrobats, and a fish of a pound weight will more than once jump several times its own length out of the water when hooked before coming to the net. # CALIFORNIA TO BE RULER OVER WAVES

New York, August 30.—The new battleship California will be the world's first electric dreadnaught and from point of size will be greater than any foreign battleship built or building. The California and her two sister ships, the Mississippi and the Idaho, already authorized, will each displace 32,000 tons, almost one thousand more than the new dreadnaught Pennsylvania now on the way to completion.

The California will be a ship of innovations. She will cost \$7,800,000 without her armor or armament, which is expected to cost as much more. She will have a speed of twenty-one knots an hour, will be 624 feet long, 97 feet across her beams and will draw 30 feet of water. She will carry twelve fourteen-inch guns, mounted three abreast in a turret, twenty-two five-inch rapid fire guns and will have four submerged torpedo tubes.

The principal feature of the new dreadnaught, however, is the machinery for propelling her by electricity. She will be driven by motors which will deliver electricity made by steam. The navy experts believe the electric installation is cheaper than steam propulsion and reduces the weight of machinery. The collier Jupiter has been so successful with electric machinery that the navy feels justified in adapting it to a dreadnaught.

Outwardly the California will bring a drastic change of line and appearance to the battlefleet. Instead of the blunt gray nose of the present day big fighter her bows will be tapered into a graceful yacht-like stem much like those of the famous clipper sailing ships that carried the American flag at the head of the world's swiftest craft in the 40's and 50's. It will be the first time since the steel ships replaced the old frigates and ships of the line that clipper stems have been seen in the fleet. Her overhanging bow will project more than twenty feet beyond her cutwater and will give place for three anchors instead of two as on the present ships. The third will hang plumb over the stem. The new bow will make for keeping the California a dry ship, as the sailors say, keeping her foredeck free of water in all but the heaviest weather. The fine underwater lines of the other ships which make for speed have been carried above the water line on the California and her bows will be flared near the deck line, so when she does not cut through a wave she will lift her head over it.

The model of the California's hull was thoroughly tested in the testing tank at the navy yard here before the radical changes were decided upon. When the new ship is ready for her first trial trip late in 1917 or 1918 she promises a most interesting study for the naval experts of the world.

# TWO HURT WHEN CAR TURNS OVER

Laurel Allen, this city, sustained a broken collar bone, and Willard Wilson, colored, was bruised about the arm and shoulder, when an automobile, driven by Wilson, turned completely over on the national pike three miles east of West Jefferson, Saturday morning.

Four other occupants of the car were unhurt. The machine was badly damaged. Another auto picked up Allen and took him to Columbus for medical treatment.

Lee Barker, Dick Barker and Leo Burke, and a colored man whose name was not learned, all of this city, were the other members of the party, which was bound from the London fair to Columbus.

The cause of the accident is unknown. Wilson is said to have been driving at a brisk speed, when the machine suddenly reared into the air and turned over, pinning Allen, who was in the front seat, under it and throwing the others clear.

# IMPORTANT MEETING TONIGHT

# ATHLETICS TRIM CINCINNATI TEAM

**Perkins' Campbells Get Short End of 8 to 1 Score - Locals Fatten Willow Record With Four Homers - Small Crowd - Linson Pitches Fine Game.**

Cork Linson pitched the greatest game of his life Sunday afternoon for the Athletics, holding the Perkins' Campbells of Cincinnati to five scattered little hits and a lone run. Heavy hitting, which included four home runs, brought the Washington tally list up to eight. The game was tight with few errors. Threatening weather cut the attendance. Four hundred saw the game.

Of the five home runs during the game it may be said that three, those of Corwin, Lewis, and Newman of the Campbells, lit inside the field and rolled under the canvas. Those of Linson and Hungeling were clean liners, both dropping a considerable distance on the outside of the canvas.

The Campbells had a little hard luck getting their team in the field. Pfister, fielder, Popkins, first sacker and Gardner, pitcher, missed the train in Cincinnati, and Manager Becker was forced to run in subs, switch his lineup and himself take a hand in the game.

Saturday night Manager Noon of the Athletics received word from Spinnay, of Cincinnati, that Jack Reis, who was to have pitched his first game for Washington Sunday, had had the tip of a finger on his left hand cut off and couldn't play.

The Perkins, Campbells have been signed for another game here next Sunday afternoon, and a double header Monday afternoon, Labor Day. The Sunday game will start on schedule time. The first game Monday will start at 1:15 o'clock.

# WEIGH THEIR HATS.

**A Fad of Fussy Men Who Are Cranks in the Matter of Headwear.**

In the back part of a Broadway hatter's store there is a pair of scales that are used only in the case of particular demands by particular customers. As a general thing you don't look for scales in a hatter's, and the proprietor explained his reason for having them in this way:

"You will often find very fussy men when it comes to buying a hat. With them the weight of headgear is of prime importance. An ounce more or less gives them the fidgets when they have made a rule of life to wear only such and such weights on their heads. So I keep the scales to convince them. It is well that I do. It has settled many an argument with a grouch and sold me many a hat.

"You may call them queer for wanting the exact weight they call for or within and not over that weight; but, come to think it over, they are not any queerer than the men who rush in here at the beginning of summer demanding summer headgear because they simply can't endure their heavy winter hats any longer.

"Well, they buy a straw and go away perfectly satisfied they are prepared for summer heat. And the hat they buy? Why, by actual weight on these very scales it often weighs two to four ounces more than the winter hat they have been wearing. One of our good customers has regularly shifted from a twelve ounce winter slouch to a fifteen ounce summer straw and has been happy in the change."

It is a fact, however, that thousands of men know the truth of what the Broadway hatter says, but still buy heavy straws.—New York Sun.

# ESSENTIALS OF PITCHING.

**First Comes Control, Then Knowledge of a Batter's Weakness.**

"Control is the thing," say all the great pitchers, and all the great pitchers agree that a study of the batsman is next in importance. There are certain batters who can punish certain kinds of balls, while against a different style of pitching they are correspondingly weak. If a batter likes a fast ball at the waist line it becomes the duty of the wise pitcher never to give him a ball to his liking. Perhaps he is weak on a curve ball at the knee on the outside. The foxy pitcher makes a specialty of offering him that kind of delivery in abundance. In deciding what is best to pitch to the various batters a brainy catcher is of wonderful assistance.

Then, too, the pitcher must study situations. When he divines that a sacrifice is the play it is usually the best plan to keep the ball high. Such a ball is harder to meet squarely, while it is almost impossible to give it definite direction. On a low ball the skillful bunter can usually place it toward first or third, as is desired. For batters who have a tendency to pull away pitchers usually keep the ball on the outside, mostly depending on the curve. Seldom do batters who pull meet such balls squarely. As a rule they hit fast balls on the inside hard. The batter who hugs the plate closely and steps into the ball is bothered most by a fast ball on the inside, as it has a tendency to make him meet the ball on the handle, thereby losing most of the force he puts into the swing.

The pitcher must also take into consideration the position of his infield and must know who is covering the base on a throw, so that he may pitch to aid his infielders.—Billy Evans in St. Nicholas.

**FOREIGN DEVILS.**  
The Answer a Chinese Official Gave a British Consul.  
In his book "Home Life in China" Isaac Taylor Headland gives an account of the Chinese superstitions regarding the foreigner, one of which has resulted in their calling him Kuei-tzu, or "devil." A very amusing story, says he, is told of a red haired, red whiskered, blue eyed British consul at Canton who was, as are most of the British officials, of an investigative disposition and was anxious to know why it was that the Chinese call us of the west "foreign devils." Now he understood that the Chinese idea of a demon is that he is a red haired, red bearded, blue eyed being who quails at nothing that comes in his way. One day when a Chinese official was calling on the consul the latter asked him:  
"Why is it that the Chinese call us devils?"  
The official at first hesitated, but, being pressed, he finally said, "I do not care to tell you."  
"But I should take it as a great favor if you would tell me. I am very anxious to know."  
"I cannot tell you," said the official. "Why not?" asked the consul.  
"Because you would be angry if I told you."  
"By no means. I would not be so unreasonable as to ask you a question and then be offended because you answered it. On the other hand, I should be greatly obliged to you."  
Being thus pressed until he was unable to refuse, the official finally eyed the consul from head to foot and said slowly and reluctantly, "Well, it is because you look like devils."
